Summary of Changes:

The table below summarises any changes to the Guidance following the publication on September 30th 2019.

Version	Date	Chapter	Summary of changes

Introduction

1. Aim of the Guidance

This document (“the guidance”) aims at providing guidance to institutions for completing the reporting template on Financial Market Infrastructures (FMIs). The template's goal is threefold, to:

1. provide a structure in which to report relevant data;
2. assist institutions in mapping their access and use of financial market infrastructures;
3. assist resolution authorities when identifying critical FMIs and related potential risks for continuity of access through resolution.

2. Scope: which FMI service providers?

Institutions should report all direct and indirect participation in FMIs, i.e. payment, clearing and settlement systems¹, as well as trade repositories². In addition, institutions shall report their participation in **trading venues**. Even though trading venues are not strictly speaking FMIs, a bank in resolution is likely to need to retain access to trading venues. The use of **intermediaries** (such as correspondent³ or custodian banks) should also be reported.

Payment Systems (PS)

Payment Systems (PS) comprise both

- Large-Value Payment Systems (LVPS), which are mostly used to settle interbank or wholesale transactions and are often operated by a central bank. They tend to exhibit very high values and a relatively low number of transactions. Examples: TARGET2, EURO1; and
- Retail payment systems, which are used to settle retail transactions, including Point-of-Sale and other card transactions, direct debits and credit transfers. In contrast to LVPS, they tend to exhibit a large number of transactions of relatively low value. Examples: STEP2, national retail payment systems.

(I)CSDs and SSS

- (International) Central Securities Depositories ((I)CSDs) – Securities Settlement Systems (SSS): usually, the same FMIs play both roles.
 - Central Securities Depositories safekeep their participants’ assets. As defined under the CSD Regulation (CSDR)⁴, CSDs usually provide for the initial

¹ CPMI-IOSCO’s definition of FMIs refers to payment systems, CSDs, SSSs, CCPs, and TRs <https://www.bis.org/cpmi/publ/d101a.pdf>

The ECB further defines terms associated to payment, clearing and settlement systems <https://www.ecb.europa.eu/pub/pdf/other/glossaryrelatedtopaymentclearingandsettlementsystemsen.pdf>

² This section is organised along the lines of the drop-down list, which contains (I)CSD-SSS, (I)CSD and SSS.

³ Correspondent banking is defined in the ECB glossary (cf. footnote 1) as an arrangement whereby one bank (the settlement or service-providing bank) makes or receives payments (potentially performing other banking services in addition) on behalf of another bank (the customer or user bank).

⁴ Please refer to Annex 1 for all legal references used throughout this Guidance.

recording of securities in a book-entry system ('notary service') and/or maintain securities accounts at the top-tier level ('central maintenance service'). A third core service recognized by the CSDR is settlement.

- Securities Settlement Systems settle securities transactions, i.e. allow their participants to exchange securities against cash. This usually occurs in a "Delivery-versus-Payment" (DVP) mode, with immediate exchange of securities against cash, though SSS also process "Free-of-payment transactions", with transfers of securities only (the cash is then paid separately).

Note: With the introduction of TARGET2-Securities (T2S), CSDs may "outsource" their settlement functionality to T2S, a central platform operated by the ECB and linked to the participants' TARGET2 accounts. From a contractual perspective, the CSD continues to offer SSS services to its customers.

You can find the list of designated payment and settlement systems and of registered CSDs⁵ (in the EU) on the website of the European Securities and Markets Authority (ESMA) under, respectively,

https://www.esma.europa.eu/sites/default/files/library/designated_payment_and_securities_settlement_systems.pdf and

https://www.esma.europa.eu/sites/default/files/library/esma70-151-889_csd_register.pdf

Central Counterparties (CCPs)

CCPs interpose themselves between counterparties to contracts traded in one or more financial markets, "becoming the buyer to every seller and the seller to every buyer and thereby ensuring the performance of open contracts".⁶

- Securities (cash) CCPs: Cash CCPs usually clear securities (equity and/or debt) trades that are traded on a stock exchange (regulated market). This category also captures repo transactions.⁷ Securities CCPs play an intermediary role between trading and settlement, for the duration of the transaction (usually settlement occurs on t+2), and provide certainty to each seller and each buyer as to the performance of the trade.
- Derivative CCPs: Derivative CCPs take longer term positions as they interpose themselves between the two counterparties in a derivative contract. Under EMIR, CCP clearing is obligatory for standardised derivative transactions executed either OTC or on a trading venue.

You can find the list of CCPs authorised to offer services in the EU on the website of ESMA under

https://www.esma.europa.eu/sites/default/files/library/ccps_authorized_under_emir.pdf

⁵ Please note that, as the CSD Regulation is relatively recent, the authorisation process of CSDs is still ongoing.

⁶ CPMI-IOSCO, Principles for Financial Market Infrastructures, <https://www.bis.org/cpmi/publ/d101a.pdf>.

⁷ In accordance with the classification in the BIS Red Book: <https://www.bis.org/cpmi/publ/d172.htm>.

Trade repositories (TRs)

TRs maintain a centralised electronic record (database) of transaction data⁸ and have grown in importance particularly in the OTC derivatives market. They play a central role in standardising and normalising the recording of OTC derivative transactions across market participants, thereby enhancing the transparency of derivative markets and reducing risks to financial stability.

You can find the list of registered trade repositories on the website of ESMA under <https://www.esma.europa.eu/supervision/trade-repositories/list-registered-trade-repositories>. Institutions are obliged under Article 9 EMIR to report their derivatives transactions to TRs (directly for OTC trades that are not centrally cleared, through CCPs for others).

Trading venues

A trading venue is either a regulated market (a stock exchange), a Multilateral Trading Facility (MTF, i.e. a multilateral trading system operated by an investment firm or a market operator) or an Organised Trading Facility (OTF, i.e. a multilateral system which is not a regulated market or an MTF).⁹

Intermediaries

Institutions should also report their use of intermediaries (such as correspondent or custodian banks) for payment, clearing and settlement services, even where these intermediaries do not explicitly provide indirect access to identifiable FMIs.

In case such intermediaries are reported, "System Type" (c0040) should be 'Not applicable (FMI system type)', as further explained in Part 3 of this guidance.

⁸ CPMI-IOSCO, Principles for Financial Market Infrastructures, <https://www.bis.org/cpmi/publ/d101a.pdf>.

⁹ As defined in Directive 2014/65/EU of 15 May 2014 (MiFID II), art.4(1)(24).

Part 1

General Guidance

1. Scope: which entities?

In principle, resolution authorities should have a view on whether the entities in scope of the BRRD and SRMR¹⁰, articles 1 and 2 respectively, have the ability to maintain continued access to FMI service providers throughout resolution. To provide this view, the FMI report shall cover all the FMI accesses and use of intermediaries for payment, clearing, custody, and settlement services of all legal entities requested by the resolution authority.

Reporting is mandated for Relevant Legal Entities (RLEs), as well as other entities, identified by IRTs as falling within the scope of this exercise. Please refer to the Guidance on the Liability Data Report for the definition of RLEs.

With regard to the responsibilities of the SRB and NRAs within the SRMR, the scope is determined to cover significant institutions and cross-border less-significant institutions.

2. Governance

The data collected will be committing for each of the concerned entities and the SRM will communicate with senior management of the institution based on these data. As such, senior management is expected to be aware and familiar with this data and ensure an appropriate level of confidence with respect to its accurateness. To this end, the completeness and accuracy of reported data needs to be subject to an adequate validation framework within the institution.

NRAs could further specify the requirements for validation (e.g. external audit requirement). When the timing for validation interferes with the deadlines set forth in section 3 on the reporting process, the entities shall submit data by the provided deadlines and an updated report could have to be submitted if material changes occur as a result of the formal validation framework within the institution.

3. Reporting Process

The reporting frequency for the data is set to a yearly basis, for the situation as it stands at 31 December of each year prior to the reporting. The deadline for submission is set at 30 April.

Notwithstanding these provisions, resolution authorities can request the information at any time they deem necessary and/or deviate from the above reporting requirements. In times of crisis, deadlines might be very close to the reporting date. It is recognised that such short deadlines are ambitious and may require individual entities and groups to

¹⁰ Please refer to Annex 1 for references to legislation.

develop adequate IT tools. This is for banks and/or groups to define and determine as appropriate.

The report (one per group, with information on all entities in scope) shall be provided in XBRL exclusively, based on the relevant extension to the EBA Data Point Model.¹¹ The visuals of templates in Part 2 of this guidance are meant for illustrative purposes only.

The report shall be submitted to the NRA of the Banking Union jurisdiction in which the (ultimate) parent entity is incorporated, for all entities in scope. Subsequently, the NRA will transmit the report to the SRB.

SRB Templates and EU Resolution Reporting Templates

European Commission Implementing Regulation (EU) 2018/1624 of 23 October 2018 laying down implementing technical standards with regard to procedures and standard forms and templates for the provision of information for the purposes of resolution plans for credit institutions and investment firms ("the CIR") requires credit institutions to submit a number of templates (the "CIR Templates") yearly. This implementing regulation repeals the Commission Implementing Regulation (EU) 2016/1066.

The CIR governs the data banks should report and according to which specifications ("minimum procedural and technical reporting requirements"), such data shall be delivered to NRAs. These specifications are part of the EBA's "Data Point Model" (DPM), which contains all data definitions and validation rules required to submit the templates. Institutions do not need to complete CIR Template Z.09.00 FMI, which is completed through the SRB FMI Report (FMIR), as the FMIR contains all information required under the CIR.

4. Amount Reporting

Amounts (numbers of items and/or value) will be reported in Units. Amounts (value) will exclusively be reported in **EUR (counter) value and may be rounded to the nearest unit**. For foreign currencies, this means that a conversion is required, which will be done at the reference rates published by the ECB¹² on the date for which the information is reported. In case this is a TARGET closing date, the exchange rate shall refer to the one published at the closest date before the reporting date.

When adding several items of information as free form text, please separate each entry by a semi-colon (;). This also applies to free form text between brackets when "other" is selected from drop-down lists.

¹¹ <https://eba.europa.eu/risk-analysis-and-data/reporting-frameworks/reporting-framework-2.9>.

¹² Where the reference rate has not been published by the ECB, banks should ask their Central Bank to provide for an appropriate conversion rate.

5. Validation rules

Several levels of checks will be run on all submissions of the FMIR:

1. A first level consists of **automated technical checks** to ensure that the submissions fulfil all formatting requirements, i.e. the filing rules;
2. A second level entails **automated consistency checks** with regard to submitted data; and
3. A third and final level of checks involves **further consistency and plausibility checks** which cannot be automatically implemented during the data collection phase.

These three levels of checks are further detailed in annex 4 to this guidance.

Part 2

Part 3 Template Related Guidance

Where relevant and possible, these definitions are aligned with existing regulatory definitions. Elements that are also requested in CIR template Z.09.00 (FMI) shall be considered to fall under the same definition as in the CIR. **In case of any remaining discrepancies the text of the regulation should prevail.**

3.1. T30.00 – FMI services – Providers and Users

c0010– ID representing combination of user, FMI, system type and intermediary

Please use a single identifier per row, which should correspond to a unique combination of user, FMI, system type and intermediary.

For example:

ID	User	FMI	System Type	Intermediary
010	Entity X	TARGET 2	Payment system	NA
020	Entity X	Euroclear FR	CSD	NA
030	Entity X	LCH	CCP – securities	NA
040	Entity X	LCH	CCP – derivatives	NA
050	Entity Y	TARGET 2	Payment system	Bank A
060	Entity Y	LCH	CCP – securities	Bank A
070	Entity Z	LCH	CCP – securities	Bank A

To the extent possible, please use the same ID for the same combination of user, FMI, system type and intermediary, in FMI Reports over different years (2020, next year 2021 etc.)

User

Group entity using payment, custody, settlement, clearing or trade repository services, as reported in CIR template Z.01.00 – Organisational structure (ORG).

c0020 – User: Entity name

Name of the Entity using payment, custody, settlement, clearing or trade repository services, as reported in CIR template Z.01.00 – Organisational structure (ORG): official name as it appears in corporate acts, including the indication of the legal form. Please refer to Part 1, Section 1 Scope of report, for information on which entities should be included in the report.

c0030 - User: Entity code

Code of the Entity using payment, custody, settlement, clearing or trade repository services, as reported in CIR template Z.01.00 – Organisational structure (ORG).

20-digit, alpha-numeric LEI code of the entity, for which the report is submitted. In the absence of a LEI, the ECB Monetary Financial Institutions unique IDentifier (MFI ID) of the entity for use in RIAD should be used. In absence of both such identifiers, a local identifier shall be used (please contact your NRA for this).

Provider

Financial Market Infrastructure (FMI)

A multilateral system among participating financial institutions, including the operator of the system, used for the purposes of recording, clearing, or settling payments, securities, derivatives, or other financial transactions.

Reference: CPMI, Principles for Financial Market Infrastructures

c0040 – Provider - FMI: System type

The type of FMI providing FMI services to the user (see Introduction for background information on FMIs):

'PS' Payment system (both retail and large-value payment systems).

'(I)CSD' (International) Central Securities Depository, including (I)CSDs that provide settlement services (internally or outsourced).

'SSS' - providers of only settlement services for securities transactions, such as T2S. T2S should only be reported in case of direct connectivity (e.g. by custodian banks).

'CCP-Derivatives' - central counterparties for derivatives clearing.

'CCP-Securities' – central counterparties for the clearing of securities transactions.

'TR' Trade Repository – registered trade repositories.

'Trading venue' – regulated markets, MTFs and OTFs.

'Other' when the system type of the FMI does not match any of the pre-defined types mentioned above. In this case, please specify the type. Institutions can also use this field to provide granular information on the card systems used for retail payments (examples: Visa, Mastercard, STMP...). Such systems should be reported if the legal entity owns the credit risk for the card issued, handles customer relationships and is responsible for transaction, authorization, billing and pricing.

'Not applicable (FMI system type)' when payment, clearing, settlement or custody services are provided by an entity that is not an FMI or trading venue, for example a custodian bank. In this case, please use column 0090 to specify the name of the firm providing the service and column 0180 to specify the service provided.

c0050 - 0060 – Provider - FMI: FMI name (included or no included in predefined list)

Commercial name of the Financial Market Infrastructure.

If the FMI is one of the FMIs included in the predefined list, please report that name in column 0050.

If and only if the relevant FMI is not available in the predefined list, please report the name in column 0060.

When 'Not applicable (FMI system type)' is reported in column 0040, these columns shall be left empty.

c0070 – Provider - FMI: FMI code

The 20-digit, alphanumeric LEI code of the FMI. Where the LEI is not available, a code under a uniform codification applicable in the Union¹³, or if not available a national code.

When 'Not applicable (FMI system type)' is reported in column 0040, this column 0070 shall contain 'NA'.

c0080 – Provider - FMI: Participation mode

Report one of the following values:

'Direct' in case of Direct participation in/membership of FMI.

By direct participant we mean a direct participant in a [...] system that can perform all activities allowed in the system without using an intermediary (including, in particular, the direct inputting of orders in the system and the performance of settlement operations).¹⁴

'Indirect' in case of Indirect participation in/ membership of FMI.

By indirect participant we mean a participant in a [...] system with a tiering arrangement that uses a direct participant as an intermediary in order to perform some of the activities allowed in the system (particularly settlement).¹⁵

'Not applicable (Mode of participation in FMI)' when 'Not applicable (FMI system type)' is reported in column 0040.

Intermediary

An Intermediary is a firm that provides clearing, payment, securities settlement and/or custody services to other firms; it can be a direct member of one or several FMIs and provide indirect access to the services offered by such FMIs. The Intermediary may either be part of the group to which the User belongs or another institution not related to that group.

¹³ Such as the ECB Monetary Financial Institutions unique IDentifier (MFI ID) of the entity for use in RIAD.

¹⁴ ECB Glossary of terms related to payment, clearing and settlement systems, December 2009.

¹⁵ Ibid.

c0090 – Provider – Intermediary: Intermediary name

Commercial name of the intermediary when 'Indirect' or 'Not applicable (Mode of participation in FMI)' is reported in column 0080 'Participation mode'.

When 'Direct' is reported in column 0080, this column 0090 shall be left empty.

c0100 – Provider – Intermediary: Intermediary code

The 20-digit, alpha-numeric LEI code of the intermediary. When the LEI is not available, a code under a uniform codification applicable in the Union¹⁶, or if not available a national code.

When 'Direct' is reported in column 0080, this column 0100 shall contain 'NA'.

Main services and governing law

c0110 – Provider – Main services and governing law: Governing law

ISO 3166-1 alpha-2 identification of the country whose law governs the access to the FMI.

In case of Direct Membership or Direct Participation, the governing law of the contract between the FMI and the User shall be reported. In case of Indirect Membership or Indirect Participation, the governing law of the contract between the intermediary and the User shall be reported. The same is true in case an intermediary is used for payment, settlement or custody services without explicit indirect access to an FMI.

c0120 - 0170 – Provider – Main services and governing law: Currencies relevant for the reporting entity

Currency(ies) in which transactions of the reporting entity are accepted and settled in the system. Only relevant currencies should be reported, e.g. currencies that account for at least 5% of total operations of the reporting institution with the FMI/intermediary.

The different currencies (EUR, GBP, USD, CHF, JPY and other) are not mutually exclusive. For 'other currencies' (c0170): ISO 4217 3 letter code of the currency(ies).

c0180 – Provider – Main services and governing law: Services provided by FMI / intermediary

Please detail e.g. if payment, clearing, settlement, custody services or other services are provided, including services with credit or liquidity exposure. This list should contain both core and ancillary services.

For CCPs: please provide information on the market segment(s) (e.g. equities, repo, commodities etc.).

Please note the importance to fill in this cell for the FMIs where system type (field 040) was filled in as "Other type of FMI" or "Not applicable (FMI system type)". This information will be used to satisfy the requirements of CIR template Z 09 (field 0110).

¹⁶ Such as the ECB Monetary Financial Institutions unique IDentifier (MFI ID) of the entity for use in RIAD.

c0190 – Provider – Main services and governing law: Services provided to FMI / intermediary

Services that the reporting entity provides to the FMI or to the intermediary, e.g. price provider, liquidity provider, cash settlement for certain currencies, custody, indirect access to (foreign) CSDs, investment counterparty, other (please specify).

Service providers

c0200 - 0220 – Provider – Service providers: Communication service providers

Providers of communication systems used by the institution to access the FMI. The different providers (proprietary communication systems of the FMI or intermediary – 'FMI proprietary', SWIFT and other providers) are not mutually exclusive.

For 'other communication service providers': the commercial name of the provider.

c0230 – Provider – Service providers: Other service providers enabling access to FMI: Name

Providers of other services that are strictly necessary for the reporting entity to use the reported FMI services, e.g. settlement bank, cash correspondent/nostro agent, liquidity provider. This provider only needs to be reported if it is distinct from the intermediary reported under c0090-0100.

The commercial name(s) of the provider(s).

Example: You may provide the names of your nostro agents for settlement in CLS.

c0240 – Provider – Service providers: Other service providers enabling access to FMI: Services necessary to reporting entity

The service(s) provided by the provider(s) reported in c0230, which are strictly necessary for the reporting entity to use the reported FMI services, such as settlement bank, cash correspondent/nostro agent, liquidity provider. These services only need to be reported if c0230 is filled (i.e. the bank reports that one or more providers, distinct from the reported intermediary, are necessary for maintaining the reported FMI services).

c0250 – Provider – Point of contact at FMI / intermediary for matters related to resolution of the entity

The point of contact for the reporting entity at the FMI. This is usually the relationship manager.

Please specify and separate the different elements with a semi-colon (;): Name ; Position or job title ; Phone Number ; E-Mail address.

3.2 T31.00 – FMI services – Mapping to critical functions

Only fill T31.00 FMI services – Mapping to critical functions for FMI services that are necessary for the provision of at least one critical function.

c0010– ID representing combination of user, FMI, system type and intermediary

Please use the single identifier provided in T.30.00 to refer to each unique combination of user, FMI, system type and intermediary (necessary for the provision of one or several critical functions).

c0020 – Critical functions: Country

Country for which the function is critical, as reported in CIR template Z 07.01 (FUNC1) and in the SRB critical functions report.

c0030 – Critical functions: Critical function ID

Critical function(s) performed by the entity, the performance of which would be impeded or prevented by the disruption of access to the payment, clearing settlement, custody or trade repository service.

Please report the same critical functions as in the SRB critical functions report (and CIR template Z.07.01) and, where possible, in the recovery plan.

ID of the critical functions as referred to in CIR template Z.07.01 (FUNC 1).

Please find below the list of codes:

Deposits	1
Lending	2
Payment, Cash, Settlement, Clearing, Custody	3
Capital markets	4
Wholesale funding	5

c0040 – Link (true)

Please fill in "true". This is needed for technical reasons.

3.3 T32.00 – FMI services – Mapping to core business lines

Only fill T32.00 FMI services – Mapping to core business lines for FMI services that are necessary for the operation of at least one of the bank's core business lines.

c0010– ID representing combination of user, FMI, system type and intermediary

Please use the single identifier provided in T 30.00 to refer to each unique combination of user, FMI, system type and intermediary.

c0020 – Core business line

Core business lines of the entity, the performance of which would be impeded or prevented by the disruption of access to the payment, clearing settlement, custody or trade repository service.

Please report the same core business lines as in CIR template Z 07.03 c0010 and, where possible, in the recovery plan.

c0030 – Core business line ID

Core business line ID corresponding to the core business line reported in c0020. Please report the same combination of core business line and core business line ID as in CIR template Z 07.03 c0010 and c0020.

c0040 – Link (true)

Please fill "true". This is needed for technical reasons.

3.4 T33.00 – FMI services – Key metrics

c0010– ID representing combination of user, FMI, system type and intermediary

Please use the single identifier provided in T 30.00 to refer to each unique combination of user, FMI, system type and intermediary.

c0020 – Segment (only for CCPs)

Market segment for which the CCP clearing service is offered (e.g. securities, repo, derivatives). Please report one line per segment.

If the service is not (directly or indirectly) provided by a CCP, please report 'NA'.

Key metrics

c0030 – Total contribution to default fund

Only report for CCPs.

Contribution (outstanding at end-of-year) to default funds, for each segment/product in which the reporting institutions is a clearing member. Use one line per segment/product, as reported under c0020.

c0040 - 0060 – Value of positions on proprietary accounts, client omnibus accounts and client segregated accounts

Proprietary accounts refer to the house account, i.e. the positions of the user.

Omnibus accounts refer to the (commingled) positions of the clients of the reporting legal entity, separated from the positions of the user.¹⁷

¹⁷ Specifically for CCP, see EMIR, REGULATION (EU) No 648/2012, article 39 (4) and (5)

Segregated accounts refer to the (separated) positions of the clients of the user, i.e. the FMI and the clearing member distinguish the positions held for the account of each client from those held for the account of other clients.

Only report for CCPs and (I)CSDs.

For CCPs: Positions at CCP in the respective account types. For (I)CSDs: securities held in the respective account types.

Positions on client accounts: only report for FMIs where the institution provides indirect access to clients.

Daily average value at end of settlement day over the previous year. If not available, daily average value over a shorter time period. To calculate daily averages, please use the opening days of reported FMIs. If not available, you may use the TARGET2 opening days as a proxy. Total values should be included, not only values of relevant currencies as reported in c0120-c0170.

c0070 - 0080 – Number of clients covered by omnibus accounts, number of clients covered by segregated accounts

Number of clients included in the different account types held by the reporting entity at the respective FMI for its clients (see c0040-0060 for a definition). Only report for CCPs and (I)CSDs. *Please report in Units.*

c0090 – Value of transactions on proprietary accounts

Transactions sent from proprietary accounts held at the FMI or at the intermediary.

Please report for payment, settlement and clearing transactions. For clearing transactions, please report the total market value of transactions executed during the year.

Only report if applicable (this field is expected not to be applicable for e.g. trade repositories or trading venues. Please refer to annex 3, for FMI types for which the field is usually not applicable).

c0100 – Value of transactions on client accounts

Transactions initiated by clients and sent from (segregated or omnibus) accounts held at the FMI or at the intermediary.

Only report for FMIs or FMI service providers where the reporting institution provides indirect access to clients.

Only report if applicable (Please refer to annex 3, for FMI types for which the field is usually not applicable).

4. A clearing member shall keep separate records and accounts that enable it to distinguish both in accounts held with the CCP and in its own accounts its assets and positions ["proprietary account"] from the assets and positions held for the account of its clients at the CCP.

5. A clearing member shall offer its clients, at least, the choice between omnibus client segregation ["client omnibus account"] and individual client segregation ["client segregated account"] and inform them of the costs and level of protection referred to in paragraph 7 associated with each option. The client shall confirm its choice in writing.

<http://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02012R0648-20160112&from=EN>

c0110 – Credit line

Credit line (committed as well as uncommitted) granted in the system in case of direct access, or by the intermediary or by another liquidity provider in case of indirect access.

Only report if applicable (Please refer to annex 3, for FMI types for which the field is usually not applicable).

c0120 – Peak of (intraday) liquidity or collateral requirements

Report for FMIs with intraday credit exposures, (this field is expected not to be applicable for e.g. trade repositories or trading venues, which do not take any credit or liquidity risk).

For (I)CSDs or payment systems in case of direct access: peak (intraday) credit usage.¹⁸

For CCPs and for FMIs not providing any credit to their participants, in case of direct access: peak of intraday liquidity requirements (e.g. variation margin in CCPs).

In case of indirect access: peak funding required by the intermediary.

Only report if applicable (Please refer to annex 3, for FMI types for which the field is usually not applicable).

c0130 – Estimates of additional liquidity or collateral requirements in a stress situation

Please estimate the potential additional liquidity or collateral requirements (e.g. variation margin, pre-funding) that the reporting entity may face in a situation of severe stress (before resolution or at the time of resolution). Only report for FMI service providers (FMIs and intermediaries) providing credit and/or liquidity. Institutions may use their internal models and methodologies for this purpose.

Only report if applicable (Please refer to annex 3, for FMI types for which the field is usually not applicable).

Reference period for averages (if different from instructions)

c0140 – First day

Where data is reported based on daily averages, begin date of the reference period for that reported data in XML-format (i.e. YYYY-MM-DD).

c0150 – Last day

Where data is reported based on daily averages, end date of the reference period for that reported data in XML-format (i.e. YYYY-MM-DD).

¹⁸ For further examples on how to calculate the peak intraday liquidity requirements, please refer to tool A(i), page 5 in the *Monitoring tools for intraday liquidity management (BCBS, April 2013)*.

Annex 2 - List of abbreviations

Please refer to Annex I for further details on relevant legislation.

BRRD	Bank Recovery and Resolution Directive
EBA	European Banking Authority
ESMA	European Securities and Markets Authority
CCP	Central Counterparty
CIR	Commission Implementing Regulation (EU) 2018/1624
CLS	Continued Linked Settlement
CSD	Central Securities Depository
CSDR	CSD Regulation
CPMI	Committee on Payments and Market Infrastructures
DVP	Delivery-versus-Payment
EURO1	The euro system of the EBA Clearing Company; payment infrastructure for the processing of large-value payment transactions in euro
FMI	Financial Market Infrastructure
FX	Foreign Exchange
ICSD	International Central Securities Depository
IRT	Internal Resolution Team
IOSCO	International Organisation of Securities Commissions
ISDA	International Swaps and Derivatives Association
ITS	Implementing Technical Standard
KA	FSB key Attributes of Effective Resolution Regimes for Financial Institutions
LEI	Legal Entity Identifier
MIFID	Markets in Financial Instruments Directive
MTF	Multilateral Trading Facility
NA	Not Applicable
NRA	National Resolution Authority
OTC	Over-The-Counter
OTF	Organised Trading Facility
PS	Payment System
PS-LV (or LVPS)	Payment System – Large ValuePVP Payment-versus-Payment
Q&A	Questions and Answers
RA	Resolution Authority
RIAD	Register for Institutions and Assets Database
PSCC	Payment, Settlement, Clearing, Custody (used for intermediaries providing such services to the reporting institution)
SRB	Single Resolution Board
SRMR	Single Resolution Mechanism Regulation
SSS	Securities Settlement System
STEP2	Pan-European Automated Clearing House for retail payments in euro

SWIFT	Society for Worldwide Interbank Financial Telecommunication
T2S	TARGET2 Securities
TARGET2	Trans-Automated Real-time Gross settlement Express Transfer (the large-value payment system operated by the ECB and the NCBs, which is also used for monetary policy purposes)
TR	Trade Repository
TV	Trading venue
XBRL	eXtensible Business Reporting Language
XML	eXtensible Markup Language

Annex 3 Relevant data items, per type of FMI

(guidance on when certain fields need to be filled, depending on the type of FMI)

		Payment Systems	CSDs	CC Ps	Trading Venues	Trade Repositories
T30.00

Peak of (intraday) liquidity or collateral requirements	0120					
Estimated additional liquidity or collateral requirements in a stress situation	0130					

Annex 4 - Data Validations

1. Level 1 checks

Please refer to the SRB XBRL Filing Rules available on the SRB website.

2. Level 2 checks

The second level of checks relate to consistency of the reported data and are run as part of data validations of XBRL instance. Please refer to the validation rules available on the SRB website.

1. Level 3 checks

After the submission process, the SRB has developed further tools to assist with the data validation. These checks may still give rise to a need for resubmission if errors are identified. A non-exhaustive list of those checks can be found below:

1.1 Verification of General Information

	FMIR tabs	Description of the check
1.1	T30.00	c0020/c0030 Entity name and entity code correspond and are consistent with other reports.

1.2 Completeness Checks

	FMIR Tabs	Description of the completeness checks
2.1	T30.00	ID c0010 should not be empty.
2.2	T30.00	Entity name c0020 and code c0030 should not be empty.
2.3	T30.00	Participation mode c0080 should not be empty.
2.4	T30.00	Entity name c0020: Information should be reported for all the Relevant Legal Entities, as well as other entities identified by IRTs as falling within the scope of this exercise.
2.5	T30.00	System Type c0040: Most institutions need access to all types of FMIs, directly or indirectly. The institution is therefore expected to include, at a minimum, one trading venue, payment system, one CCP and one CSD (except if not necessary for its specific business model).
2.6	T30.00	FMI name (included in pre-defined list) c0050: This field should be empty if c0040 System Type is 'NA'.
2.7	T30.00	FMI name (included in pre-defined list) c0050: This field should not be empty, except <ol style="list-style-type: none"> 1) for non-EU FMIs (not included in pre-defined list); 2) when 'NA' is reported in c0040 System Type; 3) when "other" is reported under c0040 System Type and the bank wishes to report its use of a market infrastructure provider that is not an FMI or trading venue (e.g. Visa or Mastercard); or

Guidance on the FMI Report

		4) otherwise in exceptional cases. For example: not all trading venues may be included in the pre-defined list.
2.8	T30.00	FMI name (included in pre-defined list) c0050: Most institutions need access to all types of FMIs in their home country. Provided the conditions in the previous check are met, banks are expected to report at least one retail payment system, one trading venue, one CCP and one CSD in their home country, as well as TARGET 2, (except if this does is not necessary for its specific business model).
2.9	T30.00	FMI name (not included in pre-defined list) c0060: This field should be empty if <ul style="list-style-type: none"> - c0040 System Type is 'NA'; or if - c0040 System Type is not 'NA' and c0050 is filled.
2.10	T30.00	FMI name (not included in pre-defined list) c0060: If System Type c0040 is not 'NA' and c0050 is empty, then this field should be filled.
2.11	T30.00	FMI code c0070: When 'NA' is reported in column 0040, this column shall also contain 'NA'.
2.12	T30.00	Participation mode c0080: It should be 'NA' when 'NA' is reported in c0040 (System Type).
2.13	T30.00	Intermediary name c0090: When 'Direct' is reported in c0080 (Participation mode), this column shall be left empty.
2.14	T30.00	Intermediary name c0090: When 'Indirect' or 'NA' is reported in c0080 (Participation mode), this column shall not be left empty.
2.15	T30.00	Currencies relevant for the reporting entity (c0120-c0170): At least one column should be filled, except if System Type = TR (in which case it may be empty).
2.16	T30.00	Services provided by FMI/intermediary c0180 should not be empty and should not contain 'yes' or 'no' but a list of services.
2.17	T30.00	Communication service provider c0200-0220: At least one column should be filled.
2.18	T30.00	Point of contact c0250 should not be empty.
2.19	T33.00	Segment c0020 should not be empty [mandatory field].
2.20	T33.00	Segment c0020: If T30 c0040 System Type = CCP, then segment should not be 'NA'.
2.21	T33.00	Total contribution to default fund (c0030) should not be empty if T30 c0040 System Type = CCP.
2.22	T33.00	Value of positions (c0040-c0060): At least one column should not be empty if T30 c0040 System Type = CCP or CSD.
2.23	T33.00	Number of clients (c0070-c0080): At least one column should not be empty if T30 c0040 System Type = CCP or CSD, except if the bank only does proprietary trading and does not offer services to clients.
2.24	T33.00	Value of transactions (c0090-c0100): At least one column should not be empty, except if T30 c0040 System Type = 'TR' or 'Other'.
2.25	T33.00	Credit line c0110: This column should not be empty if T30 c0040 System Type CSD and T30 FMI Name c0050 = Euroclear Bank or Clearstream Banking Luxembourg. Note that other FMIs may also provide credit lines (see guidance and table in annex 3).
2.26	T33.00	Credit line c0110: This column should be empty if T30 c0040 System Type = TR or Trading venue.

2.27	T33.00	<p>Peak of (intraday) liquidity or collateral requirements c0120: This column should not be empty if</p> <ul style="list-style-type: none"> - T30 c0040 System Type = CCP or if - T30 c0040 System Type = CSD and T30 FMI Name c0050 = Euroclear Bank or Clearstream Banking Luxembourg or if - T30 c0040 System Type = Payment System and T30 FMI Name c0050 = CLS or Target 2. <p>Note that liquidity and collateral requirements may also apply in case of other FMIs (see guidance and table in annex 3).</p>
2.28	T33.00	<p>Peak of (intraday) liquidity or collateral requirements c0120: This column should be empty if T30 c0040 System Type = TR or Trading venue.</p>
2.29	T33.00	<p>Estimates of additional liquidity or collateral in a stress situation c00130: This column should not be empty if T30 c0040 System Type = CCP or if T30 c0040 System Type = CSD and T30 FMI Name c0050 = Euroclear Bank or Clearstream Banking Luxembourg.</p>
2.30	T33.00	<p>Estimates of additional liquidity or collateral in a stress situation c00130: This column should be empty if T30 c0040 System Type = TR or Trading venue.</p> <p>Note that liquidity and collateral requirements may also apply in case of other FMIs (see guidance and table in annex 3).</p>

1.3 Appropriateness Checks

	FMIR Tabs	Description of the appropriateness checks
3.1	T30.00	<p>FMI name (not included in pre-defined list) c0060: Should not contain the name of intermediaries (other banks) or service providers other than FMIs (such as IT service providers or communication service providers, for example SWIFT; or SEPA, which is not an FMI services provider).</p> <p>It should also not contain other possible designations of the same FMI or FMI service instead of filling c0050 in accordance with the drop-down list (e.g. Swapclear instead of LCH, LCH Clearnet instead of LCH SA...)</p>
3.2	T30.00	<p>FMI name c0050 or c0060: The FMI should be classified appropriately according to the System Type selected in c0040. For example, a CCP should not be reported under System Type "Payment System"; T2S should not be reported under "CSD".</p>

1.4 Cross-Checks

	FMIR Tab	Description of the cross-check
4.1	T30.00	<p><u>Consistency across entities</u>: If one or several entities use the parent [or a sister company or a subsidiary in scope of the report] as indirect access provider (c0080 = 'Indirect', c 0090 = [name of parent entity], c0100 [code of parent entity]) to a given FMI (as described by c0040, c0050 or c0060), then the parent should appear as a direct participant (c0080 = 'direct') in that given FMI in another line in the FMI report.</p>

4.2		<u>Consistency across FMI types</u> : if the bank reports membership of a CCP it is expected to report at least one trading venue and one TR.
4.3	T30.00	<u>Consistency with the Critical Functions Report (CFR)</u> : If the CFR indicates that the bank performs important trading and/or derivatives activities, then the bank is expected to report participation in at least one CCP and CSD in the given country in T30 c0040 System Type.
4.4	T30.00	<u>Consistency with the CFR</u> : If the bank performs critical functions in the area of payment, clearing or settlement services, it is expected to report in the FMIR at least <u>in the given country</u> : <ul style="list-style-type: none"> - If critical function = payment services to non-MFIs: one retail payment system; - If critical function = payment services to MFIs: one large-value payment system; - If critical function = clearing services: one CCP; - If critical function = settlement services: one CSD; - If critical function = capital markets – derivatives: one CCP, one TR; - If critical function = capital markets – secondary markets: one trading venue, one CCP, one CSD.
4.5	T31.00	<u>Consistency with the CFR</u> : For each given country, functions reported as critical in c0030 should have been assessed as critical in the Critical Functions Report for that same country. For example if capital markets is not assessed as a critical function for an institution, no FMI shall be reported as critical based on the critical function capital markets.
4.6	T32.00	<u>Consistency with Z.07.03</u> : The combination Core business line (0020) and Core business line ID (0030) should correspond to that same combination in Z.07.03 FUNC 3 (Core business line c0010 and Business line ID c0020).

1.5 Plausibility checks

	FMIR tab	Description of the plausibility check
5.1	T33.00	Key metrics (c0030-c0100) should be commensurate to the relative size of the bank and the overall values and volumes of the given FMIs / segments.
5.2	T33.00	Retail payment systems should have a higher number of transactions with lower average value per transaction than large-value payment systems
