CERTIFICATION LETTER FROM THE ACCOUNTING OFFICER

The annual accounts of the Single Resolution Board for 2022 have been prepared in accordance with Title IX of the Financial Regulation applicable to the general budget of the European Union, the accounting rules adopted by the Commission's Accounting Officer and the accounting principles and methods adopted by the SRB Accounting.

I acknowledge my responsibility for the preparation and presentation of the annual accounts of the Single Resolution Board in accordance with Article 89 of the SRB Financial Regulation.

I have obtained from the authorising officer, who certified its reliability, all the information necessary for the production of the accounts that show the Single Resolution Board's assets and liabilities and the budget implementation.

I hereby certify that based on this information, and on such checks as I deemed necessary to sign off the accounts, I have a reasonable assurance that the accounts present fairly, in all material aspects, the financial position, the results of the operations and the cash flow of the Single Resolution Board.

Done in Brussels on 15 June 2023

5. The Single Resolution Board

5.1. Mission

The Single Resolution Board ('the SRB' or 'the Board') is the central resolution authority within the Banking Union. Together with the National Resolution Authorities (NRAs) of participating Member States (MS), it forms the Single Resolution Mechanism (SRM). The SRB works closely with the NRAs, the European Commission (EC), the European Central Bank (ECB), the European Banking Authority (EBA) and national competent authorities (NCAs).

Its mission is to ensure an orderly resolution of failing banks with minimum impact on the real economy, the financial system, and the public finances of the participating MS and beyond.

The Board was established by Regulation (EU) No 806/2014 on the Single Resolution Mechanism (SRM Regulation). The SRB was established as an independent EU Agency in January 2015 and became fully operational, with a complete set of resolution powers, on 1 January 2016.

5.2. Governance

As set out in Article 63 of the SRM Regulation, the governance framework for implementing the budget and presenting the accounts and for the discharge procedure is as follows:

- 1. The Chair shall act as authorising officer and shall implement the Board's budget.
- 2. By 1 March of the following financial year, the Board's Accounting Officer shall send the provisional accounts, accompanied by the report on budgetary and financial management during the financial year, to the Court of Auditors for observations. By 31 March of the following financial year, the Board's Accounting Officer shall submit the report on budgetary and financial management to the members of the Board, and to the European Parliament, the Council and the Commission.
- 3. By 31 March each year, the Chair shall transmit to the European Parliament, the Council and the Commission the Board's provisional accounts for the preceding financial year.
- 4. On receipt of the Court of Auditors' observations on the Board's provisional accounts, the Chair, acting on his or her own responsibility, shall draw up the Board's final accounts and shall send them to the Board in its plenary session, for approval.
- 5. The Chair shall, following the approval by the Board, by 1 July each year, send the final accounts for the preceding financial year to the European Parliament, the Council, the Commission, and the Court of Auditors.
- 6. Where observations are received from the Court of Auditors, the Chair shall send a reply by 30 September.
- 7. By 15 November each year, the final accounts for the preceding financial year shall be published in the Official Journal of the European Union.
- 8. The Board, in its plenary session, shall give a discharge to the Chair in respect of the implementation of the budget.
- 9. The Chair shall submit at the request of either the European Parliament or the Council, any information referred to in the Board's accounts to the requesting Union institution, subject to the requirements of professional secrecy laid down in this Regulation.

5.3. SRB budget - legal background

The Board was established pursuant to the SRM Regulation and is entrusted with the application of the uniform provisions laid down by that Regulation and with the administration of the Single Resolution Fund ('the SRF' or 'the Fund'). Article 58 of the SRM Regulation stipulates that the Board is to have an autonomous budget, which is not part of the Union budget.

Part I of the budget — the administration of the Board

Part I concerns the administrative expenditures of the Board. It must include at least staff remuneration, administration, infrastructure, professional training and operational expenses. In accordance with Article 65 of the SRM Regulation, the Board determines and raises contributions to the administrative expenditures of the Board from each entity referred to in Article 2. These administrative contributions constitute the revenues of Part I of the budget and are collected in accordance with Commission Delegated Regulation (EU) No 2361/2017 of 14 September 2017 on the final system of contributions to the administrative expenditure of the SRB amended by Commission Delegated Regulation (EU) 2021/517 of 11 February 2021.

Part II of the budget — the Fund

Article 67 of the SRM Regulation establishes the SRF and the purposes for which the Board may use the Fund. The provisions on the establishment and functioning of the SRF are applicable as of 1 January 2016.

6. Significant accounting policies

6.1. Legal basis and accounting rules

The SRB financial statements have been drafted based on:

- the SRM Regulation;
- the SRB Financial Regulation (adopted on 17 January 2020);
- the accounting guidelines and accounting rules provided by the Commission's Accounting Officer, complemented by the closing instructions for 2022; and
- International Public Sector Accounting Standards (IPSAS) and/or International Financial Reporting Standards (IFRS).

In accordance with Articles 89 to 91 of the SRB Financial Regulation, the SRB prepares its financial statements on the basis of accrual-based accounting rules that are derived from IPSAS or, by default, IFRS.

These accounting rules, adopted by the Commission's Accounting Officer, have to be applied in order to establish a uniform set of rules for accounting, valuation and presentation of the accounts with a view to harmonising the process for drawing up the financial statements. The accounts are euro-denominated and the accounting period is the calendar year.

The SRB's accounting system consists of general accounts and budget accounts.

- The general accounts allow the preparation of the financial statements, as they show all charges and income for the financial year and are designed to establish the financial position in the form of a balance sheet as at 31 December.
- The budget accounts give a detailed picture of the implementation of the budget. They are based on the modified cash accounting principle.

The SRB, as a self-financed EU agency, is excluded from the consolidated annual accounts of the European Union.

6.2. Accounting principles

The objective of financial statements is to provide information about the financial position, performance and cash flows of an entity that is useful to a wide range of users.

The overall considerations (or accounting principles) to be followed when preparing the financial statements are laid down in EU Accounting Rule 2 and are the same as those described in IPSAS 1, namely, fair presentation, accrual basis, going concern basis, consistency of presentation, aggregation, offsetting and comparative information.

Preparation of the financial statements in accordance with the abovementioned rules and principles requires the SRB's management to make estimates that affect the reported amounts of certain items in the Statement of financial position and Statement of financial performance, as well as the disclosures of contingent assets and liabilities.

Fair presentation

Financial statements must present fairly the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, revenue and expenses set out in the EU accounting rules. EU accounting rules, with additional disclosures when necessary, are applied to ensure that financial statements are presented fairly.

Current versus non-current

According to the presentation requirements set out in EU Accounting Rule 2, a distinction should be made between current and non-current financial assets and liabilities on the face of the statement of the financial position.

An entity should classify an asset as <u>current</u> when:

- it expects to realise the asset or intends to sell or consume it in its normal operating cycle;
- it holds the asset primarily for the purpose of trading;
- it expects to realise the asset within 12 months from the reporting date; or
- it is cash or a cash equivalent.

All other assets should be classified as <u>non-current</u>.

An entity should classify a liability as <u>current</u> when:

- it expects to settle it in its normal operating cycle;
- it holds the liability primarily for the purpose of trading;
- it is due to be settled within 12 months from the reporting date; or
- the entity does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

All other liabilities should be classified as non-current liabilities.

Accrual basis

In order to meet their objectives, financial statements are prepared using accrual-based accounting. On this basis, the effects of transactions and other events are recognised when they occur (and not when cash or its equivalent is received or paid) and they are posted in the accounting records and reported in the financial statements of the period to which they relate.

Going concern basis

When preparing financial statements, the entity's ability to continue as a going concern should be assessed. The financial statements should be prepared on a going concern basis unless there is an intention to liquidate the entity or to cease its operations, or if there is no realistic alternative but to do so. These financial statements have been prepared in accordance with the going concern principle, which means that the SRB is deemed to have been established for an indefinite duration.

Consistency of presentation

According to this principle, the presentation and classification of items in the financial statements should be retained from one period to the next.

Aggregation

Each material class of similar items should be presented separately in the financial statements. Items of a dissimilar nature or function should be presented separately unless they are immaterial.

Offsetting

Assets and liabilities, and revenue and expenses, should not be offset unless required or permitted by an EU accounting rule.

Comparative information

Except when an EU accounting rule permits or requires otherwise, comparative information should be disclosed in respect of the previous period for all amounts reported in the financial statements. When the presentation or classification of items in the financial statements is amended, comparative amounts should be reclassified unless reclassification is impracticable.

According to Article 90 of the SRB Financial Regulation, the information reported in the financial statements should be relevant, reliable, understandable and comparable, including the information on the accounting policies applied (as explained in EU Accounting Rule 2 and IPSAS 1).

6.3. Basis for preparation

A) Currency and basis for conversion

The financial statements are presented in euros, the euro being the European Union's functional and reporting currency.

B) Transactions and balances

Foreign currency transactions are translated into euros using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of financial performance.

C) Use of estimates

In accordance with IPSAS and generally accepted accounting principles, the financial statements necessarily include amounts based on estimates and assumptions made by management and based on the most reliable information available. Significant estimates include but are not limited to provisions, financial risk, accounts receivable, accrued income and charges, contingent assets and liabilities, and the degree of impairment of intangible and tangible assets and of financial instruments. Actual results could differ from those estimates. Changes in estimates are reflected in the period in which they become known.

D) Chart of accounts

The chart of accounts used by the SRB follows the structure of the European Commission's chart of accounts.

6.4. Statement of financial position

Intangible assets

Acquired intangible assets (such as computer software licences) are stated at historical cost, less accumulated amortisation and impairment losses. The assets are amortised on a straight-line basis over their estimated useful lives.

Internally developed intangible assets (or internally generated software) are capitalised when the relevant criteria under the EU accounting rules are met. The capitalisable costs include all directly attributable costs necessary to create, produce and prepare the asset to be capable of operating in the manner intended by management. Costs associated with research activities, non-capitalisable development costs and maintenance costs are recognised as expenses when incurred. Intangible assets (developed in-house or not) have a finite useful life and are amortised in 4 years.

DEPRECIATION RATES					
Type of asset Straight-line depreciation rate					
Software	25%				
Internally generated software	25%				

As required by EU Accounting Rule 6, internally generated software items are capitalised if their eligible development costs are above a locally established capitalisation threshold. The Board decided to capitalise only the eligible development costs related to IT projects with a total value above EUR 1 million.

Until a project is finished, the deliverables are formally accepted by the project owner, the development costs are classified as 'Intangible assets under construction' and gradually accumulate the eligible costs incurred. Only when the resulting intangible asset enters into production as intended, that is when its useful life starts and the amortisation is charged.

Property, plant and equipment

All property, plant and equipment are reported at their historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition or construction of the asset.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits or the service potential associated with

the item will flow to the SRB and its cost can be measured reliably. Repairs and maintenance costs are charged to the Statement of financial performance during the financial period in which they are incurred. Land and works of art are not depreciated, as they are deemed to have an indefinite useful life.

Depreciation on other assets is calculated using the straight-line method to allocate the decrease in value over their estimated useful lives, as shown in the table below.

DEPRECIATION RATES					
Type of asset	Straight-line depreciation rate				
Buildings	4%				
Plant, machinery and equipment	10% to 25%				
Furniture	10% to 25%				
Fixtures and fittings	10% to 25%				
Vehicles	25%				
Computer hardware	25%				
Other tangible assets	10% to 25%				

Tangible assets are shown as 'under construction' if they are not yet in operation after the moment of receipt at the SRB premises because they require further installation and/or configuration. Assets under construction are not depreciated, as these assets are not yet available for use.

The lease of fixed assets for which the SRB holds substantially all the risks and rewards of ownership are classified as fixed assets under financial lease.

Financial instruments accounting policies in accordance with IPSAS 41

Financial assets and financial liabilities are recognised when an entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through surplus or deficit) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through surplus or deficit are recognised immediately in surplus or deficit.

Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either their amortised cost or fair value, depending on the classification of the financial assets.

Classification and measurement

All SRB's investment in debt securities meet the following conditions, and are subsequently measured at FVTNAE:

- they are held within a management model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the outstanding principal amount.

The SRB performs regular reviews of the contractual terms of acquired financial assets in the investment portfolio to check whether the cash flows are solely payments of principal and interest on the outstanding principal amount.

The SRB does not measure any of its investment in debt securities through surplus or deficit or at amortised cost.

Debt instruments classified as at FVTNAE

Debt instruments held by the SRB in the investment portfolio are classified as at FVTNAE. Fair value is determined by the reference to the quoted market price. The listed debt instruments are initially measured at fair value plus transaction costs.

Subsequently, changes in the carrying amount of these debt instruments as a result of impairment gains or losses, and interest income calculated using the effective interest method are recognised in surplus or deficit. The amounts that are recognised in surplus or deficit are the same as the amounts that would have been recognised in surplus or deficit, if these debt instruments had been measured at amortised cost. All other changes in the carrying amount of these debt instruments are recognised in other comprehensive income and accumulated under the heading of Net change in fair value of debt instruments measured at fair value through net assets/equity.

When these debt instruments are derecognised, the cumulative gains or losses previously recognised in other comprehensive income are reclassified to surplus or deficit.

Impairment of financial assets

The SRB recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at FVTNAE. The amount of expected credit losses is updated at each reporting date to reflect changes in the credit risk since the initial recognition of the respective financial instruments.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, a 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months of the reporting date.

For these financial instruments, the SRB recognises a lifetime ECL when there has been a significant increase in credit risk since the initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the SRB measures the loss allowance for that financial instrument at an amount equal to a 12-month ECL. The assessment of whether the lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since the initial recognition, instead of on evidence of a financial asset being credit-impaired at the reporting date or an actual default occurring.

The SRB considers a financial asset to have low credit risk when it has an external credit rating of 'investment grade' as per globally understood definition.

The SRB regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying any significant increase in credit risk before the amount becomes past due.

The SRF Risk Management developed and maintains a list of indicators of significant increase in credit risk that is followed up on reporting dates. The primary indicator assessed is credit status of the issuer, in particular, the external credit rating.

The SRF Risk Management concludes that the movement of the external credit rating within the credit rating scale from AAA/AA/A/BBB to the non-investment grade range (lower then BBB-) constitutes a significant increase in credit risk.

Issuers whose financial situation has deteriorated based on the primary indicator are placed in a Watchlist and are followed up by the SRF Risk Management. The monitoring is based on indicators such as the Spread over Risk-Free Rate and/or Credit Default Swaps.

Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss, if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above.

Probability of default (PD)

The probability of default (PD) is a risk measure in credit risk management that estimates the probability that a borrower will not be able to make scheduled repayments. Following IPSAS 41, the PD is calculated in a forward-looking and point-in-time manner.

The models used for establishing the PD are retrieved from external sources and are based on market assumptions. The results based on these models give a PD on different time periods, i.e. 1 year, 2 years, etc. The PD is retrieved either for a 1-year horizon (if in stage 1) or for a longer horizon (if in stage 2) matching the maturity period of the bond.

Loss given default (LGD)

LGD represents the percentage of the Exposure at Default (EaD) which the SRB expects to lose if a counterparty goes into default. The SRB applies the Basel approach risk weight of 45% LGD to all the exposures, unless they are subordinated (75% risk weight). The latter is not foreseen in the investment policy of the SRB.

As for the exposure at default, for debt instruments, this is represented by the assets' gross carrying amount at the reporting date.

For debt instruments, the expected credit loss is estimated as the difference between all the contractual cash flows that are due to the SRB in accordance with the contract, and all the cash flows that the SRB expects to receive, discounted at the original effective interest rate.

If the SRB has measured the loss allowance for a financial instrument at an amount equal to a lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for a lifetime ECL no longer exist, the SRB measures the loss allowance at an amount equal to a 12-month ECL at the current reporting date.

The SRB recognises an impairment gain, or loss in profit, or loss for all financial instruments with a corresponding adjustment to other comprehensive income and accumulates it in the investment revaluation reserve. It does not reduce the carrying amount of the financial asset in the Statement of financial position.

Derecognition

The SRB will derecognise an investment when, and only when:

- the contractual rights to the cash flows from the financial asset expire or are waived; or
- the financial asset is transferred and the transfer qualifies for derecognition.

When the investment is derecognised (sold), the following methods may be applied: first in, first out (FIFO), weighted average cost (WAC), and specific identification of investments.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables include receivables and cash and cash equivalents.

Cash and cash equivalents

Cash and cash equivalents are financial instruments and defined as current assets. They include cash in hand and deposits held at call with banks.

Receivables

Receivables are carried at the original amount less the write-down for impairment. Under IPSAS 29, a write-down for the impairment of receivables is applied when there is objective evidence that the SRB will not be able to collect all the amounts due in accordance with the original terms of the receivables. The amount of the write-down is the difference between the asset's carrying amount and the recoverable amount.

Under IPSAS 41, impairment is determined in order to apply lifetime expected credit losses. The amount of the write-down is the difference between the asset's carrying amount and all the cash flows that the SRB expects to receive over the life term of the receivables.

The amount of the write-down is recognised in the Statement of financial performance.

Provisions

A provision is recognised when: (i) the SRB has a present legal or constructive obligation towards a third party as a result of past events; (ii) it is more likely than not that an outflow of resources will be required to settle the obligation and (iii) the amount can be reliably estimated. Provisions are not recognised for future operating losses. The amount of the provision is the best estimate of expenditures expected to be required to settle the present obligation at the reporting date. Where the provision involves a large number of items, the obligation is estimated by weighting all possible outcomes by their associated probabilities (the expected value method).

Financial liabilities

Financial liabilities measured at amortised cost are classified as 'Other financial liabilities'.

Payables

Payables arising from the purchase of goods and services are recognised on receipt of the invoice for the original amount and corresponding expenses are posted in the accounts when the supplies or services are delivered and accepted by the SRB.

Accrued/deferred income and charges

In accordance with EU Accounting Rule 10 complemented by IPSAS 19 ('Provisions, contingent liabilities and contingent assets'), accruals are made to recognise the amounts to be paid for goods or services that have been received or supplied but have not been paid for, invoiced or formally agreed with the supplier. As transactions and events are recognised in the financial statements in the period to which they relate, at the end of the accounting period, accrued expenses are recognised based on an estimated amount of the transfer obligation of the period. The estimation of accrued expenses is done in accordance with detailed

guidelines issued by Finance and Accounting when assessing the open commitments for amounts to be carried over to the next financial period.

Irrevocable payment commitments

An irrevocable payment commitment (IPC) represents an alternative to a cash payment in the context of the ex-ante contributions to the Single Resolution Fund (SRF). An IPC can be defined as an obligation taken by a credit institution towards the SRB to pay its contribution in the future.

Legal basis

Pursuant to Article 70(3) of the SRM Regulation, the available financial means of the SRF may include IPCs, which are fully backed by collateral of low-risk assets unencumbered by any third-party rights, provided that the collateral is at the free disposal of and earmarked for exclusive use by the SRB for the purposes specified in Article 76(1) of the SRM Regulation.

So far, the only type of collateral accepted by the SRB in relation to IPCs has been cash collateral. The amounts received are deposited in one dedicated bank account with a national central bank (NCB).

Article 7 of the Council Implementing Regulation 2015/81, provides that the 'recourse to IPCs shall in no manner affect the financial capacity and liquidity of the Fund'. In addition, when an IPC is called in by the SRB under the terms of the IPC agreement (partially or in full), the institution is obliged to transfer the called amount on the banking day following the call notice.

Article 8(3) of the Council Implementing Regulation 2015/81 states that during the initial period, under normal circumstances, the Board shall allow the use of IPCs upon request from an institution. The Board shall allocate the use of IPCs evenly among those institutions requesting it. For the 2022 ex-ante contributions cycle, the Board in its Executive Session on 11 April 2022 decided to limit the IPCs at 15% of their total payment obligation (SRB/ES/2022/18). When calculating the annual contributions of each institution, the Board shall ensure that, in any given year, the sum of those IPCs does not exceed 30% of the total amount of annual contributions raised in accordance with Article 70 of the SRM Regulation.

In all IPC agreements signed with institutions, it is provided that in case the interest that was accrued on the collateral over the course of the year is negative, the institutions have to replenish it to the SRB (upon a request of the SRB), or, in case the interest accrued is positive, that the positive interest balance is to be returned to an institution. The interest accrued shall be settled in the beginning of the following financial year.

IPC interest rate settlement

As explained above, according to the existing IPC agreements, the credit institutions have to replenish the amounts transferred as cash collateral for their IPC obligations in order to compensate for the monthly outflow of negative interest payable to the NCB where the IPC-related amounts are held, or they will be reimbursed by any positive interest amount accrued on their IPC collateral in accordance with the remuneration of the respective NCB bank account. For the financial year 2022, there was a negative and a positive balance of the IPC interest to be settled with institutions. This settlement will occur in the first part of 2023. The majority of the receivables above have the nature of receivables and recoverables from non-exchange transactions, unless specifically stated otherwise. The pending amounts receivable were assessed for recoverability and no reduction in value was considered necessary.

Accounting treatment

The IPCs consist of two essential components:

- 1. the obligation (commitment) itself, which is unconditional, but at the same time depends on the probability of the IPC being paid out in the event of a specific set of circumstances arising;
- 2. the back-up for the commitment, which as explained above is the cash collateral received by the SRB for a specifically determined portion.

Therefore, the accounting treatment of IPCs has to take into account these two separate aspects as follows:

- 1. the commitment component of a contractual arrangement such as an IPC could not be recognised as a receivable (or revenue) because, while the IPC is certain and of a fixed amount, it does not meet the criterion of being due. Therefore, being dependent on the occurrence of future events, this commitment has to be recognised and disclosed as a contingent asset in the SRB financial statements (in line with IPSAS 19, 'Provisions, contingent liabilities and contingent assets');
- on the other hand, based on the specific nature of the collateral accepted by the SRB (cash collateral only), the cash received has to be recognised in the statement of the financial position as an asset; however, a related liability should also be recognised in this respect.

If an IPC is called and once payment is received (new cash inflow from the credit institution to the SRB), the SRB will return the corresponding collateral (cash outflow from the SRB decreasing the SRB's liability concerning the cash collateral held). If an institution fails to pay the full amount, the SRB is entitled to take possession of the cash collateral to discharge the commitment undertaken by the institution.

Liabilities related to post-employment employee benefits

The SRB must provide its members of the Board with a transitional allowance and a retirement pension. The transitional allowance is paid from the first day of the month following that in which the public office holder ceases to hold office. The pension is due at the date of retirement which must be in line with the expected retirement age. The amount of these benefits depends on several factors, including the basic salary and the period of service. They are classified as 'Post-Employment Employee Benefits'.

These benefits qualify as defined benefit obligations (DBO) of the EU and are calculated at each reporting date by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount. No plan assets are attached to this obligation. The defined benefit obligation is calculated by actuaries using the projected unit credit method. The present value of the DBO is determined by discounting the estimated future cash outflows using interest rates of government bonds that are denominated in the currency in which the benefits will be paid (euro), and that have terms to maturity based on the estimation of the period of service.

Current service cost is the increase in the present value of the DBO resulting from employee service in the current period. Net interest on the net defined benefit liability is the change during the period in the net defined benefit liability that arises from the passage of time. The SRB recognises the net interest expense and other expenses related to the defined benefit plans in the Statement of financial performance within a separate line called 'Movements in post-employment benefits' in the surplus or deficit.

Re-measurements of the net defined benefit liability comprise actuarial gains and losses, which are recognised in the net assets/equity (other comprehensive income).

6.5. Statement of financial performance

Revenues

Non-exchange revenues

The *ex-ante* contributions collected via the NRAs from the credit institutions represent non-exchange revenues. Non-exchange revenues are defined as those revenues from transactions in which an entity receives value from other entities without directly giving approximately equal value in exchange.

The SRF is composed of contributions from credit institutions and certain investment firms from the 21 Member States participating in the banking union. The SRF ensures that the financial industry, as a whole, finances the stabilisation of the financial system. The SRF will be gradually built up during its first 8 years (2016-2023) and must reach the target level of at least 1% of the amount of covered deposits of all credit institutions within the banking union by 31 December 2023.

The administrative contributions collected by the SRB from the banks are also classified as non-exchange revenues. The determination and raising of Administrative Contributions is based on the Commission Delegated Regulation (EU) 2017/2361 of 14 September 2017 on the final system of contributions to the administrative expenditures of the Single Resolution Board, which came into force on 8 January 2018 and was amended by Commission Delegated Regulation (EU) 2021/517 of 11 February 2021. In line with the European Commission's accounting guidelines, the advance instalments have been recognised as revenues up to the level of the total expenditure for the year. The outstanding amount of funds received and not spent have been booked as long-term pre-financing received (from contributors).

Restatements of ex-ante contributions for previous periods

According to Article 17(3) of Commission Delegated Regulation (EU) 2015/63 of 21 October 2014, 'the information submitted by the institutions to the resolution authority is subject to restatements or revisions' and the SRB 'shall adjust the annual contribution in accordance with the updated information upon the calculation of the annual contribution of that institution for the following contribution period'. Each year on 1 June, the SRB makes an assessment of the resulting amount from restatements concerning previous periods that had to be included in the contributions cycle for the year N + 1. If the amount is material (in relation to the non-exchange revenues from *ex-ante* contributions of year N), then these revenues for year N are adjusted for the final annual accounts.

Exchange revenues

Revenues from the sale of goods and services are recognised when the significant risk and rewards of ownership of the goods are transferred to the purchaser. Revenues associated with a transaction involving the provision of services are recognised by reference to the stage of completion of the transaction at the reporting date.

Financial revenues

Interest income

Financial revenues from investment in securities consist of accrued interest income recognised in the surplus or deficit for all interest-bearing instruments on an accrual basis using the effective interest rate method rate (EIR) and from cashed coupons at coupon date.

Net realised gains/losses from sales of investments

The net realised gains or losses from sales of debt instruments measured at net assets/equity under IPSAS 41 are accounted at the date when the proceeds from selling the securities are received (in accordance with the settlement date accounting convention). The net realised result from selling securities will be included in the financial results for the period.

Expenditure

Exchange expenses arising from the purchase of goods and services are recognised when the supplies are delivered and accepted by the SRB. They are valued at original invoice cost.

When a request for payment or cost claim is received and meets the recognition criteria, it is recognised as an expense for the eligible amount. At year-end, incurred eligible expenses due to the beneficiaries but not yet accounted for are estimated and booked as accrued expenses.

Leases

Leases where the lessor retains a significant portion of the risks and rewards inherent to ownership are classified as operating leases. Payments made under operating leases are charged to the Statement of financial performance for the portion accrued during the financial year. This is the case for rent paid.

Interest expense and other financial expenses

As with interest income, interest expense is recognised in the surplus or deficit for all negative interest-bearing instruments on an accrual basis (transaction costs included).

6.6. Contingent assets and liabilities

Contingent assets

A contingent asset is a possible asset that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the SRB. A contingent asset is disclosed when an inflow of economic benefits or service potential is probable.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the SRB. Or it may be a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, or because the amount of the obligation cannot be measured with sufficient reliability.

According to EU Accounting Rule 10 'Provision, Contingent Liabilities and Contingent Assets' (and IPSAS 19) as implemented by the SRB, the level of probability will drive an important difference in the accounting treatment, as follows:

- 'Probable' if the probability of an unsuccessful outcome is above 50%, which entails recording a provision for litigation (in full);
- 'Possible' if the probability of an unsuccessful outcome is between 10% and 50%, which entails
 disclosure as contingent liabilities and/or recording of a (partial) provision for litigation; and

• 'Remote' if the probability of an unsuccessful outcome is below 10%, which entails disclosure on a voluntary basis.

Moreover, according to the same EU Accounting Rule 10 §4.5.(2), in the extremely rare case where no reliable estimate can be made, and a liability exists that cannot be recognised, this liability is disclosed as a contingent liability.

7. Notes to the Statement of financial position

A) Tangible and intangible fixed assets

A.1) Intangible assets – Overview of movements

Accumulated amortisation and impairment 31.12.2022		(50,552.57)	-	(1,566.00)	(3,134,023.62)	(420,633.69)	(979,903.91)	(2,839,051.76)	(7,425,731.55)
Net carrying amounts 31.12.2022		81,234.00	2,170,358.88	522.00	731,939.00	418,340.00	173,865.00	-	3,576,258.88

In conformity with EU Accounting Rule 7, amortisation and depreciation charges have been recorded on a monthly basis via an automated calculation routine based on the date of receipt of the assets. The amortisation/depreciation of each item starts in the month of acquisition.

B) Current receivables and recoverables

Description	31.12.2022	31.12.2021
Current receivables (non-exchange)	175,982.52	41,732.48
Receivables from Member States	-	-
Receivables from administrative contributions (2022 cycle) and other customers	175,982.52	
Receivables from credit institutions within the deferred settlement of administrative contributions (final system)	-	41,732.48
Sundry receivables (exchange)	56,213.91	82,028.22
Staff	44,099.48	37,923.06
Others	12,114.43	44,105.16
Deferred charges	2,817,366.00	667,717.00
Accrued interest receivable from banks	51,936,275.24	25,707,745.21
TOTAL	54,985,837.67	26,499,222.91

Receivables

The SRB calculates the contribution amounts for the current financial year. Additionally, it (re)calculates the previously invoiced contributions of institutions that changed scope, status or other data in the past year(s) and for which those changes were reported by the ECB in the current contribution cycle. Any differences arising from the recalculation under the final system (reflected in equal receivables and payables) can be settled in subsequent financial years (DR 2017/2361 Article 10(7)). Please see page 43 where the amounts payable from recalculation are disclosed.

In January 1, 2022, the amended Commission DR (EU) 2021/517 entered into force. Under the new system, the administrative contributions will be paid in two instalments at two different points in the year.

Deferred charges

The deferred charges mostly represent pre-paid expenses for software licences and other maintenance, insurance and service contracts that are associated with the delivery of services for periods ending after 31 December 2022.

C) Cash and cash equivalents

Regarding the unrestricted cash held at banks, the Board has bank accounts with four commercial banks for the cash management of the administrative budget and expenditure.

Description	31.12.2022	31.12.2021
Unrestricted cash	67,961,002.89	87,995,962.80
Current bank accounts — commercial banks	67,961,002.89	87,995,962.80
Imprest accounts	-	-
Cash in hand ('caisses')	-	-
Transfers (cash in transit)	-	-
Short-term deposits and other cash equivalents < 3 months	-	-
Restricted cash (Fund usage) and cash collateral	39,518,266,850.89	35,407,133,888.32
Current bank accounts — national central banks (strategic cash)	31,181,755,871.55	21,289,220,996.84
IPC account with a national central bank	6,948,499,517.30	5,489,833,032.44
Cash under investment mandate (tactical cash)	1,388,011,462.04	8,628,079,859.04
TOTAL	39,586,227,853.78	35,495,129,851.12

The cash collected from ex-ante contributions for the SRF is deposited in bank accounts with National Central Banks (NCBs) in Eurozone Member States. These funds may be used under strict rules when there is a

resolution case requiring the use of the SRF and for the coverage of certain eligible expenditures of the Fund (e.g. negative bank interest and bank fees).

During 2022, the SRB opened one new NCB bank account and now the SRF funds are held in a total of 19 bank accounts opened with 12 NCBs.

The cash collateral backing up the IPC agreements is held in one dedicated bank account with one NCB from the euro area. The purpose of the cash collateral is to secure the full and punctual payment of IPCs when called in by the SRB. If an institution fails to pay the full amount when an IPC is called in, the SRB is entitled to seize and apply the cash collateral in discharge of the commitment undertaken under the IPC agreement.

For the purpose of investment activity, the SRB holds six dedicated bank accounts with the custodian bank. These current accounts are presented separately under 'Restricted cash' as they hold the tactical cash of the portfolio while being managed under the investment portfolio mandate.

D) Net assets

According to the accounting recognition of revenues from administrative contributions, at year-end there is no surplus or deficit from administrative activities (accordingly, the net assets are zero).

With the entry into operations of the Single Resolution Fund (SRF or 'the Fund') from 1 January 2016, and the yearly collection of ex-ante contributions, there is a financial result giving rise to net assets from the SRF activities. Those reserves, over time, are expected to accumulate from one financial period to another and they represent resources entrusted to the SRB to be safeguarded and used where necessary, to ensure the efficient application of resolution tools and the exercise of resolution powers conferred on the SRB by the SRM Regulation.

Net assets include also the Fair Value revaluation reserve as well as actuarial gains/losses from post-employment benefits.

The Fair value revaluation reserve represents the cumulative gains and losses arising from the revaluation of investments in debt instruments classified as at FVTNAE, net of cumulative loss allowance recognised on these investments and cumulative gain/loss reclassified to profit or loss upon disposal or reclassification of these investments.

Movements in Fair Value revaluation reserve	2022	2021
FV reserve on 31.12	111,843,641.69	265,857,734.64
ECL 1.1.2021	-	36,152,138.19
FV reserve as at 1 January	111,843,641.69	302,009,872.83
Revaluation	(2,391,247,201.84)	(193,285,799.63)
Sale	(6,727,984.31)	13,508,499.99
ECL 31.12.2022	(20,165,345.50)	(10,388,931.50)
TOTAL	(2,306,296,889.96)	111,843,641.69

E) Financial liabilities (non-current)

Applying the provisions of the EU Accounting Rule 11, the financial liabilities of the Board consist of its payables. They are classified as current liabilities except where the liabilities have maturities of more than 12 months after the balance sheet date. Payables (including accrued charges, deferred income and other liabilities) are classified in the category of financial instruments 'Other financial liabilities'. Further disclosures are presented below in subsection O, 'Financial instruments'.

Long-term provision for building restoration

As a result of leasing a new building that at the end of lease must be returned to owner in the original status, a long term provision was booked in the accounts at the end of the year as follows:

Description	31.12.2022	31.12.2021
Opening Balance	-	-
Additional Provisions	280,000.00	-
Release of unused amounts	-	-
Amounts used	-	-
Other	-	-
Present value adjustments	-	-
TOTAL	280,000.00	-

Long-term payables from SRB specific activities (Irrevocable Payment Commitments)

This item represents the counterpart of the cash collateral received by the SRB as an alternative to ex-ante contributions under the established IPC framework.

Description	31.12.2022	31.12.2021
Opening balance	5,513,103,530.10	4,509,398,953.49
Collected within the year	1,442,749,629.59	1,027,944,443.58
Voluntary termination of IPCs	(628,925.41)	(24,239,866.97)
Total long-term payables from SRB specific activities	6,955,224,234.28	5,513,103,530.10

Other long-term liabilities

Pre-financing received from banks

Description	31.12.2022	31.12.2021
Opening Balance	73,674,850.95	97,306,187.75
Funds collected within the year and not spent	8,887,506.48	43,266,286.45
Funds used within the administrative contributions cycle for the previous periods (assessed on accrual basis)	(30,408,564.50)	(66,897,623.25)
TOTAL	52,153,792.93	73,674,850.95

The amount outstanding for long-term pre-financing received from banks (for administrative contributions) is the cumulative total of the amount of funds collected within a year and not spent by the end of that year.

According to Article 18(1) of the SRB Financial Regulation, the Board has to use the funds representing positive budgetary results for previous financial periods to reduce the total amount of administrative contributions invoiced to the institutions in scope. As a result, in 2022 the Board took the decision to use the positive budgetary result for 2020 and collect the remaining amount.

F) Provisions for other risks and charges

Description	31.12.2022	31.12.2021
Opening Balance	242,750.00	651,600.00
Additional Provisions	-	141,650.00
Release of unused amounts	(178,550.00)	(550,500.00)
Amounts used	-	-
Other	-	-
Present value adjustments	-	-
TOTAL	64,200.00	242,750.00

At year end, the provision for legal charges was adjusted in line with the developments in the court proceedings and also, to the usage/non-usage of the provisioned amounts according to agreements with counter-parts. Please refer also to the details (in section L, 'Disclosures on appeals and legal cases') for more information on the topic of potential legal costs.

G) Current payables

Description	31.12.2022	31.12.2021
Amounts payable	192,785.98	346,065.50
Vendors	192,785.98	346,065.50
Member States		-
Sundry payables	4,405,138.84	1,876,883.63
Staff	283.49	283.49
Other (1)	4,404,855.35	1,876,600.14
TOTAL	4,597,924.82	2,222,949.13
(1) Other sundry payables	31.12.2022	31.12.2021
Assets — goods received without invoice (including Marquis building WIP)	4,311,942.77	1,870,628.96
Inter-agency payables related to staff mobility	14,553.86	4,420.92
Social security-related payables	547.60	848.94
Amounts to be reimbursed to banks (difference from administrative contributions related to previous cycles)	64,249.00	-
Other sundry payables	13,562.12	701.32

IPC interest

Description	31.12.2022	31.12.2021
IPC interest receivable from banks (IPC TOP-UP)	-	25,707,745.21
IPC interest payable back to banks	2,637,531.22	-
TOTAL	2,637,531.22	25,707,745.21

Until September 2022 and according to the existing IPC agreements, the credit institutions had to replenish the amounts transferred as cash collateral for their IPC obligations in order to compensate for the monthly outflow of negative interest payable to the NCB where the IPC related amounts are held.

However, in the positive interest rate environment established in September 2022 based on ECB provisions, at year-end, there was an outstanding accrued interest payable. This bank interest income received by the SRB in the dedicated NCB account for IPC collateral will not be retained by the Board, but shall be reimbursed to the concerned banks at the beginning of 2023.

H) Other accrued charges and deferred income

Accrued charges

According to EU Accounting Rule 12, in addition to other accrued charges, a liability for untaken holidays (accumulating compensated absences) has been included in the Statement of financial position under accrued charges.

Description	31.12.2022	31.12.2021
Accrued charges	12,442,285.77	8,836,999.70
Untaken annual leave	907,655.50	997,500.33
Other accrued charges	11,534,630.27	7,839,499.70
Accrued bank interest and fees charges	520.00	11,514,331.97
TOTAL	12,442,805.77	20,351,331.67

Since mid-September 2022, the bank interest rate became positive according to European Central Bank provisions for ECB deposit facility rate (and €STR i.e. the Euro Short-term rate). Therefore, the cash and cash equivalents have generated accrued bank interest receivable instead of accrued bank interest payable (please see page 25 - note 7.B.).

In 2022, other accrued charges represent:

Description	31.12.2022	31.12.2021
IT costs	2,696,061.34	2,814,687.66
Consulting and advisory services	5,513,545.85	1,896,664.74
Portfolio management and custody	828,658.00	806,277.18
HR costs	944,012.64	770,787.52
Communication and translation services	631,819.79	743,230.38
Other	490,825.36	507,683.89
Building management	429,707.29	300,168.00
TOTAL	11,534,630.27	7,839,499.37

Deferred income

The SRB moved on 1 February 2016 into a building located at Treurenberg 22, Brussels. The convention for usufruct provided for a term of lease of 15 years and for a rent-free period of 3 months at the beginning of the occupancy period.

The amount representing the gratuity was initially recorded as deferred income and is recognised in the Statement of financial performance over the full term of the lease. On top of the rent charges, the Board also paid the landlord's costs for work done to re-design the physical space of the office building in line with the SRB's needs. These costs were paid according to a well-determined reimbursement schedule, which forms an integral part of the convention for usufruct.

Description	31.12.2022	31.12.2021
Deferred income from the gratuity of 3 months' rent free (on moving into the new premises)	360,004.00	399,637.00
Corresponding portion recycled in the surplus or deficit	(39,633.00)	(39,633.00)
Total deferred income Treurenberg building (1)	320,371.00	360,004.00
Amounts received by the SRB to cover the various incurred costs with resolution case	1,100,021.19	-
Consumption during the year	(242,158.04)	-
Accrued Consumption	(680,233.12)	-
Total deferred income resolution case (2)	177,630.03	
TOTAL DEFERRED INCOME (1+2)	498,001.03	360,004.00

At the end of the year, the deferred income includes also the amounts received in advance by the SRB in order to cover its various costs incurred in relation to the Sberbank resolution case. Only the portion not-spent as at 31 December 2022 is disclosed above as deferred income.

Operating lease commitments

The payments related to the operating lease commitments still to be made for the period up to the end date of the lease contract (31 January 2031) for the Treurenberg 22 building amount to EUR 27 976 493.73 as shown in the schedule below:

Treurenberg 22	Charges paid	Charges still to	o be paid as at 31 D	ecember 2022	TOTAL
building (*)	during the year	< 1 year	1-5 years	> 5 years	to be paid
Operating lease	3,001,702.92	3,074,231.22	12,296,924.90	9,478,879.61	24,850,035.73

(*)The amounts have been disclosed at the level of the last applicable indexation in line with the Eurostat index.

In December 2021, the SRB signed a lease contract for additional office space (Marquis building). The actual date of the lease commencement is foreseen for the first-quarter of 2023. The payments related to the operating lease commitments for the period up to the end date of the lease contract for the second building amount to EUR 7 595 235.00 as shown in the schedule below:

Second	Charges paid	Charges still to be paid as at 31 December 2022			TOTAL
building (**)	during the year	< 1 year	1-5 years	> 5 years	to be paid
Operating lease	-	508,342.50	2,511,840.00	4,575,082.50	7,595,235.00

^(**) The amounts have been disclosed at the current level of the lease contract and they will be annually indexed in line with the Eurostat index.

I) Post-employment benefits

Background

In accordance with the EU Council Regulation 2016/300 of 29 February 2016 determining the emoluments of EU high-level public office holders (for those public office holders who entered the SRB after 2015), the permanent members of the Board of the SRB are entitled to a retirement pension and transitional allowance.

At 31 December 2022, 11 persons were in the scope of the retirement pension plan, whereas 6 former member;s of the Board have received a transitional allowance.

The defined benefit obligation (DBO) related to these benefits was assessed based on a number of assumptions summarised below and on the rules of the EU Council Regulation 2016/300. This valuation was carried out in accordance with the methodology of IPSAS 39 (and therefore, with EU Accounting rule 12).

Summary of actuarial assumptions

Valuation date	31.12.2022	31.12.2021
Discount rate	3.85%	1.00%
Inflation rate	2.20%	1.90%
Salary increase	2.20%	1.90%
Mortality tables	Prospective IA/BE tables, with - 1 year correction	Prospective IA/BE tables, with - 1 year correction
Turnover rate before retirement	8.33%/year	8.33%/year
Retirement age	65 years in case of pension rules before 2015	65 years in case of pension rules before 2015
	66 years in case of pension rules after 2015	66 years in case of pension rules after 2015
Disability	N/A	N/A
Term of orphan annuity in case of death	25 years	25 years

Movement in present value of employee benefits (DBO)

The present value of the DBO is the discounted expected future payments required to settle the obligation resulting from employee service in the current and prior periods. An analysis of the movement in DBO (in both current and previous years) is shown below:

Description	Retirement pension	Transitional allowance
Defined Benefit Obligation / Net Defined Benefit Liability at 1 January 2022		14,418,705.63
Components of Defined Benefit Cost		
Defined Benefit Cost recognized in surplus or deficit		
Current service cost	1,487,299.63	147,117.53
Net interest revenue	47,764.78	2,700.69
Total Defined Benefit Cost	1,535,064.41	149,818.22
	(1)	(2)
Total movement in post-employment benefits costs (Statement of financial performance) (1+2)		1,684,882.63
Re-measurements recognized in net assets/equity (OCI)		
Actuarial (gains)/losses arising from:		
Changes in demographic assumptions	-	-
Changes in financial assumptions	(5,985,020.91)	(51,141.55)
Experience adjustments	1.459.486.69	548,246.43
Total	(4.525.534.22)	497,104.88
	(3)	(4)
Total Actuarial (gains)/losses in Net Assets (Other Comprehensive Income) (3+4)		(4,028,429.34)
Total Defined Benefit Cost	(2,990,469.81)	646,923.10
Cash Flows		
Direct Benefit payments	-	(487,970.27)
Defined Benefit Obligation / Net Defined Benefit Liability at 31 December 2022	(2,990,469.81)	158,952.83
	(5)	(6)
Total Net Defined Benefit Liability at 31 December 2022 (5+6)		11,587,188.65

The expected expenses of post-employment benefits for the following year amount to EUR 1 478 940.00.

Sensitivity

The SRB should also disclose the sensitivity of each significant actuarial assumption in order to present details on how the DBO would have been affected by changes that were reasonably possible at the reporting date.

Sensitivity analysis on DBO	31.12.2022	31.12.2021
Discount rate plus 25 basis points (bp)	11,157,299.00	13,760,528.00
Discount rate minus 25 bp	12,042,688.00	15,121,628.00
Inflation plus 50 bp	12,745,208.00	16,221,098.00
Inflation minus 50 bp	10,597,130.00	12,909,640.00
Life expectancy plus 1 year	11,278,718.00	13,883,022.00
Life expectancy minus1 year	11,893,373.00	14,961,223.00

8. Other significant disclosures

J) Contingent assets

Irrevocable payment commitments

Any commitment entered into under the IPC contractual arrangements is disclosed as a contingent asset that is highly dependent on the probability of a future event. This future event is the calling in of IPCs in the event of specific circumstances. Details of the accounting treatment of IPCs are provided on page 18-19.

Description	31.12.2022	31.12.2021
IPCs — the contractual commitment	6,955,224,234.28	5,513,103,530.10
TOTAL	6,955,224,234.28	5,513,103,530.10

K) Borrowing agreements signed

Recital 13 of the Intergovernmental Agreement acknowledges that situations may exist where the means available in the SRF are not sufficient to undertake a particular resolution action and where ex-post contributions should be raised in order to cover the necessary additional amounts are not immediately accessible.

On 8 December 2015, the Economic and Financial Affairs Council endorsed a harmonised loan facility agreement (LFA) that was signed by the 21 participating Member States (19 Euro Area Member States and BG and HR upon their entry into the Banking Union).

LFAs will be terminated upon the entry into force of the Common Backstop. As at 31 December 2022, no financial liabilities were recognised.

L) Disclosure on appeals and legal cases

The SRB is financially exposed, directly or indirectly through NRAs, and to administrative and judicial appeals against its decisions, as further described below.

At the date of issuing these final annual accounts, the SRB is of the view that it is probable that an outflow of economic resources will be required to settle one of the pending cases. Consequently, the exposures related to this pending case will be recognised as provision in the Statement of financial position. This exposure is nevertheless limited to the legal costs of the opposing party's legal representation, the amount of which is estimated at EUR 64,200.00.

As regards the disclosure of contingent liabilities, reference is made to the following paragraphs (here in section L) which provide for the assessment of the SRB at the date of preparation of final financial statements. The SRB is closely monitoring the evolution of all pending appeals and court cases against the SRB. The SRB also obtains information from the NRAs about the status of the national judicial and administrative proceedings against the national authorities.

Appeals and litigation regarding ex-ante contributions

At the end of 2022, 86 court cases related to ex-ante contributions were pending against the SRB before the General Court, of which 27 were lodged in 2022.

In September 2020, three cases were decided by the General Court in favour of the applicants. The SRB appealed those three judgments before the Court of Justice. The Commission also brought one appeal. In July 2021, the Court of Justice decided on two of those appeals, confirming the infringement of the duty to state reasons but quashing the decision of the General Court insofar as it found the Delegated Regulation 2015/63 to be partially unlawful and the decision not to be appropriately authenticated. On 4 March 2022, the Court decided on the remaining two appeals with a similar outcome.

Subsequently, in order to address the findings of the Court of Justice as regards the standard of reasoning, the SRB re-adopted its decisions for cases pending before the General Court with respect to the 2016-2020 ex-ante contribution cycles, thus enabling the General Court to rule on the merits of these cases.

In addition, on 20 January 2021, the General Court handed down a judgment in case T-758/18 – ABLV v. SRB, that rejected the applicant's case. On 30 March 2021, the applicant lodged an appeal against the General Court's judgment before the Court of Justice which the Court of Justice dismissed on 29 September 2022.

Other cases, including cases brought against the decision determining the ex-ante contributions calculated for 2022, alleging a breach of rules, may affect the calculation of those contributions. Given that some of those allegations have a probability of success of over 10%, the likelihood of an outflow of economic resources in those cases should be classified as possible.

A new methodology is in place for the calculation of the estimated difference in contributions between the original ex-ante contribution decision and a potential revised decision (calculating "deltas"). The SRB applied this new methodology for the first time in 2022 (in the context of the 2021 annual accounts). The same methodology was applied also this year (in relation to the 2022 annual accounts) and resulted in an estimated potential outflow of economic resources of €1.89 billion versus €5.51 million in 2021.

For only a few of the legal cases related to ex-ante contributions, the SRB could not reliably assess the difference between the amounts received and the potential revised amounts ("deltas"). This is because one or more pleas in such cases relate to components of the calculation methodology where the SRB is unable to calculate deltas due to the absence of necessary data points. Given that the calculation methodology relies on a distribution system, such absence of data points implies that the amounts at risk could not be reliably assessed.

The large shift in value from €5.51 million to €1.89 billion is due to the fact that last year, the SRB calculated deltas only for relevant litigation cases related to the 2021 cycle, as the process of withdrawal and re-adoption for earlier cycles would not result in an outflow of economic resources. For the 2022 annual accounts, the SRB has calculated deltas for relevant litigation cases for all contributions cycles.

With regard to appeals and court cases pending before the NRAs and national administrative courts, the SRB notes that the Court of Justice has clarified that EU courts have exclusive competence for reviewing the legality of the SRB's calculation of ex-ante contributions and related matters (see judgment of the Court - Grand Chamber - of 3 December 2019, Case C-414/18, Iccrea v Banca d'Italia, preliminary ruling, EU:C:2019:1036). It follows that national courts do not have competence to annul these decisions and, hence, the risk of an outflow of economic resources stemming from cases against ex-ante contributions at national level is remote. Therefore, the SRB is not disclosing any contingent liability in relation to such cases.

At the time of issuing these final annual accounts, the SRB considers that it is also possible that an outflow of economic resources will be required to settle the legal costs of the opposing party's legal representation in those cases with a probability of success between 10% and 50%.

In addition to the estimated legal costs for pending ex-ante cases, the SRB is involved in taxation proceedings aimed at determining the level of legal costs to be paid by the SRB for closed cases, in which the SRB was ordered to bear the legal costs of the opposing party. Further to these legal costs for the main proceedings, the taxation proceedings as such will only lead to a negligible (additional) outflow of economic resources consisting of the legal costs for the taxation proceedings, if at all.

Please see below the total amounts recognised as contingent liabilities regarding legal cases on ex-ante contributions at EU level:

	31.12.2022	31.12.2021
Contingent liabilities from legal cases (ex-ante contributions)	1,887,073,416.21	5,509,446.47
Contingent liabilities from legal fees (ex-ante contributions and others)	4,557,000.00	2,555,000.00
Total	1,891,630,416.21	8,064,446.47

Litigation on Banco Popular Español resolution

Following the adoption of the resolution scheme in respect of Banco Popular Español S.A. (BPE) by the SRB on 7 June 2017, legal actions were brought before the General Court and the Court of Justice by former shareholders and creditors of the bank.

From the 109 court cases related to BPE's resolution pending against the SRB before the General Court and Court of Justice at 31 December 2022¹, 104 legal cases were suspended by the Court.

In its five rulings of 1 June 2022, the General Court confirmed the legality of the SRB's decision to resolve BPE and the European Commission's endorsement of that resolution scheme, both of which implement the resolution legal framework. In addition, the claim for damages has been dismissed and the applicants have been ordered to pay the costs. Five appeals have been brought against four of those rulings. In light of the General Court's rulings of 1 June 2022 and the pleas submitted by the appellants, the SRB considers that, for these new cases, the likelihood of a negative outcome can be considered as remote².

In addition to the cases referred to above, following the adoption on 17 March 2020 of the decision determining whether compensation needs to be granted to former shareholders and creditors of BPE (Valuation 3 decision), seven legal actions were brought before the General Court against the SRB.

On 17 November 2020, one of these legal actions was dismissed by order of the General Court, and the Court of Justice has confirmed that judgment. There are therefore six pending cases against the Valuation 3 decision concerning Banco Popular Español. In light of the General Court's rulings of 1 June 2022 and the pleas submitted by the applicants, the SRB considers that, for these cases, the likelihood of a negative outcome can be considered as remote.

At the end of 2022, several court proceedings related to the resolution of BPE were pending at national level. If there is a successful outcome for the appellants before the national courts resulting in damages to be repaid by the local NRA, the SRB may have to return the corresponding amounts in total or in part (according to Article 87(4) Regulation (EU) No 806/2014). Although the SRB's resolution decision has been found to be in accordance with the applicable legal framework by the General Court, at this stage, it is difficult to reasonably predict the outcome of this litigation and to estimate its potential financial effects due to the complex, specific and unprecedented legal system created by the new resolution legal framework. In this context, the SRB is disclosing the nature of the contingent liabilities associated with this litigation, but it is not in a position to quantify the financial effect.

Nevertheless, given that national courts are bound by European courts' rulings and that the decision of the local NRA was limited to implement the SRB's resolution decision, which has been found to be in accordance with the applicable legal framework, it seems to be highly unlikely or remote that national courts may issue a ruling against the local NRA, declaring its decision unlawful

¹ This includes as per 31 December 2022, 95 suspended appeals brought against the resolution decision, 4 new standalone actions for damages, 5 suspended appeals concerning access to documents, all before the General Court. In addition, there are 5 appeals before the Court of Justice against the judgments of the General Court in the pilot cases.

² The European Commission has brought one of the appeals against the judgment of the General Court in case T-481/17. In light of the object of that appeal and the absence of legal costs given the inter-institutional nature of that appeal, even a negative outcome in that case would have no financial consequences for the SRB.

Litigation on Sberbank resolution

Following the adoption of the resolution schemes in respect of Sberbank d.d and Sberbank Banka by the SRB as well as of the decision on the assessment of the conditions for the resolution of Sberbank Europe on 1 March 2022, eight legal actions were brought before the General Court and the Court of Justice by former shareholders of the banks.

At this stage of the proceedings and on the basis of the information available, the SRB considers that the likelihood of an outflow of economic resources as result of the pending court cases is remote.

At the end of 2022, several court proceedings related to the resolution of Sberbank entities were pending at national level. In case of successful outcome for the appellants before the national courts resulting in damages to be repaid by the local NRA, the SRB may have to return totally or partially the corresponding amounts (according to Article 87(4) Regulation (EU) No 806/2014). At this stage, it is difficult to reasonably predict the outcome of this litigation and to estimate its potential financial effects due to the characteristics of the resolution legal framework and the specific circumstances of the resolution action taken in relation to those entities. In this context, the SRB is disclosing the nature of contingent liabilities associated with this litigation, but is not in a position to quantify the financial effect.

Litigation on decisions taken in relation to ABLV Bank, AS and ABLV Luxembourg Bank S.A.

Following the SRB decisions on the assessment of the conditions for the resolution of ABLV Bank, AS and ABLV Luxembourg Bank S.A. on 23 February 2018, two legal actions were brought before the General Court.

On 14 May 2020, one of these legal actions was dismissed as inadmissible by order of the General Court. That order of the General Court was appealed before the Court of Justice which dismissed the appeal on 24 February 2022. Therefore, there is no risk of any economic outflow.

On 6 July 2022, the other legal action was dismissed by a judgment of the General Court. That judgment of the General Court has been appealed before the Court of Justice. At this stage of the proceedings and on the basis of the information available, the SRB considers that the likelihood of an outflow of economic resources as result of this pending court case is remote.

On 12 February 2023, ABLV Bank AS brought an action for damages before the General Court against the European Central Bank and the SRB, seeking compensation for the damage allegedly suffered as a result of the discontinuation and liquidation of its business and that of its Luxembourgish subsidiary. Given that the factual and legal elements presented in the action are closely related to those in the appeal proceedings pending before the Court of Justice described above, the General Court has decided to stay the proceedings until the decision closing the appeal before the Court of Justice. The SRB considers that the likelihood of an outflow of economic resources as result of this pending court case is remote.

Litigation on the decision taken in relation to PNB Banka

Following the SRB decision on the assessment of the conditions for the resolution of PNB Banka on 15 August 2019, one legal action was brought before the General Court.

At this stage of the proceedings and on the basis of the information available, the SRB considers that the likelihood of an outflow of economic resources as result of this pending court case is remote.

MREL cases

Following the agreement reached on 4 November 2021 within the resolution college on the joint decisions on the resolution plan and MREL with respect to the BNP Paribas group, one legal action was brought before the General Court. At this stage of the proceedings and on the basis of the information available, the SRB considers that the likelihood of an outflow of economic resources as result of this pending court cases is remote.

Following the adoption of the decision of the SRB Appeal Panel in case 3/21 on 8 June 2022, one legal action was brought before the General Court. At this stage of the proceedings and on the basis of the information available, the SRB considers that the likelihood of an outflow of economic resources as result of this pending court case is remote.

Litigation in relation to human resources cases

On 7 and 8 May 2020 respectively, two legal actions concerning human resources issues were brought against the SRB. On 19 October 2022, the General Court dismissed the two legal actions by two judgments and ordered the applicants to pay the costs. At this stage of the proceedings, the SRB has not been informed of any appeal lodged against the judgments within the statutory deadline. Thus, the SRB currently considers that the risk of an unfavourable outcome for the SRB is remote.

Two legal actions concerning human resources matters are currently pending against the SRB. The SRB considers that the likelihood of an outflow of economic resources resulting from the pending court cases is remote for one case and possible for the other case. For the case for which the SRB considers the likelihood of an outflow of economic resources as possible, the SRB considers that the potential outflow would be limited to the legal fees, which are reflected in the overall amount of contingent legal fees as stated on page 33.

M) Resolution of Sberbank AG

On 28 February 2022, following the European Central Bank's assessment, the Single Resolution Board decided that Sberbank Europe AG in Austria and its subsidiaries in Croatia (Sberbank d.d.) and Slovenia (Sberbank banka d.d.) were failing or likely to fail. On 1 March 2022, the Single Resolution Board decided to adopt resolution schemes in respect of Sberbank d.d. and Sberbank banka d.d providing for the application of the sale of business tool. Under the respective resolution scheme, following a marketing procedure, the SRB has decided to transfer all the shares issued by Sberbank d.d. to Hrvatska Poštanska Banka d.d., and all the shares issued by Sberbank banka d.d. On the same day, the SRB also decided not to adopt a resolution scheme in respect of Sberbank Europe AG. Those decisions did not require any use of the Single Resolution Fund.

Please see above in section L, the pending litigation regarding the resolution of Sberbank AG.

N) Open commitments at year-end

The budgetary RAL (reste à liquider) represents the total open commitments for which payments and/or decommitments have not yet been made, with the outstanding amounts being carried over to the next financial year. The accounting RAL as presented below is the part of the budgetary commitments that has not been consumed (expended) during the year by an invoice or other form of claim, or through year-end accrued charges (cut-off adjustments).

Other significant disclosures	31.12.2022	31.12.2021
Total amount of commitment appropriations carried over from year N to year N+1 (C8 funds)	5,703,983.37	6,109,789.65
Portion not spent that corresponds to commitments with differentiated appropriations (not carried over)	7,564,420.59	6,901,821.77
Amount accrued in year N	(12,442,805.77)	(8,837,189.70)
TOTAL RAL at year-end	825,598.19	4,174,421.72
Total amount carried over from year N to year N+1 (R0 and C4 funds)	59,579,483,554.67	47,175,715,753.12

O) Financial instruments - (other than Investments portfolio) — disclosures

Financial instruments consist of cash, investments in securities, current receivables and recoverables, and current long-term and short-term payables, including accruals and deferrals.

Valuation of financial instruments

All the financial assets and liabilities of the SRB are valued at fair value or amortised cost. Financial instruments are valued according to EU Accounting Rule 11 and IPSAS 41.

An overview of their classification and measurement, and the treatment of changes to the carrying amount is presented below.

presented below.			
31/12/2022			
Financial instrument	Category	Measurement	Change in carrying amount
Cash and cash equivalents	Financial assets measured at amortised cost	Amortised cost	Economic outturn account
Investments in securities	Financial assets measured at FVTNAE	Fair value	Fair value reserve in net assets (Other Comprehensive Income)
Investments in securities	Financial assets measured at FVTNAE – Impairment	Fair value	Economic outturn account
Receivables	Financial assets measured at amortised cost	Amortised cost	Economic outturn account
Deferred charges and accrued income	Financial assets measured at amortised cost	Amortised cost	Economic outturn account
Payables	Financial assets measured at amortised cost	Amortised cost	Economic outturn account
Accrued charges and deferred income	Financial assets measured at amortised cost	Amortised cost	Economic outturn account
Other liabilities	Financial assets measured at amortised cost	Amortised cost	Economic outturn account

The carrying amounts of the SRB's financial instruments are as follows:

31.12.2022	31.12.2021
19,447,222,119.49	14,363,184,408.86
4,546,570,589.29	2,453,455,434.78
-	-
175,982.52	41,732.48
56,213.91	82,028.22
54,753,641.24	26,375,462.21
39,586,227,853.78	35,495,129,851.12
63,635,006,400.23	52,338,268,917.69
	31.12.2021
6,955,224,234.28	5,513,103,530.10
52,153,792.93	73,674,850.95
192,785.98	346,065.50
4,405,138.84	1,876,883.63
12,940,806.80	20,711,335.67
7,024,916,758.83	5,609,712,665.85
56,610,089,641.40	46,728,556,251.84
	19,447,222,119.49 4,546,570,589.29 175,982.52 56,213.91 54,753,641.24 39,586,227,853.78 63,635,006,400.23 6,955,224,234.28 52,153,792.93 192,785.98 4,405,138.84 12,940,806.80 7,024,916,758.83

^(*) The investment portfolio is presented in detail in section 10.3, page 50 onwards.

Financial instruments

Financial instruments give rise to financial risks, specifically to liquidity, credit and market risk. Financial risks linked to the investment of *ex-ante* contributions in the financial markets are further detailed and quantified in the risks overview of section 10.3 investment portfolio, page 50.

Liquidity risk

Liquidity risk refers to the inability to repay obligations when they fall due or the inability to sell at a prevailing market price.

The EU budgetary principles require that the overall cash resources for a given year are always sufficient for the execution of all payments.

The following measures are in place at the SRB to manage liquidity risk:

- For the moment, the funds are placed as cash-at-bank in current and in savings accounts. Therefore the
 cash available on demand could easily be used to cover short and long-term liabilities and also those of
 unpredictable maturity. However, when using the funds, the Board must comply with strict rules even if it
 has an undisputable liquidity surplus.
- The funds for administrative purposes are kept and used completely separately from the fund contributions and IPC means (with the bank accounts being completely separated and earmarked for administrative purposes, Fund resources and IPCs).
- As from 2022, with the entering into force of the amended Commission Delegated Regulation (EU) 2017/2361, the timeline for the contributions collection changed to Q1 and Q3 each year. Additionally, a new system was introduced whereby an advance payment is collected from significant institutions at the beginning of each financial year in Q1 and a final contributions in Q3. Please find more details at page 60.
- The treasury and payment operations are highly automated and rely on sound information systems. Specific procedures are applied to guarantee system security and to ensure the segregation of duties in line with the SRB Financial Regulation, internal control standards and audit principles.

Credit risk

Credit risk is the risk of loss due to a debtor/borrower non-payment of a loan or other line of credit (either the principal or interest or both) or other failure to meet a contractual obligation. Default events could include a delay in repayments, restructuring of borrower repayments and bankruptcy.

The most important financial assets are the cash held at banks and receivables. The credit risk related to the bonds in the investment portfolio is presented at page 53. The paragraphs below explain the measures in place to manage the credit risk.

Administrative contributions

Administrative resources are kept with four commercial banks for which specific credit risk conditions were applied at the moment of procuring bank services. Credit ratings of the commercial banks where the SRB holds its bank accounts are reviewed regularly.

Fund contributions

The *ex-ante* contributions collected for the Fund, together with the cash collateral from IPCs, are held in NCB accounts in eleven countries in the Eurozone.

According to the investment plan for the year, a portion of the collected funds was invested in securities with an investment grade of at least S&P BBB— or equivalent.

Receivables

All the other receivables are constantly monitored for prompt recovery, and timely action is taken for write-off based on formal evidence when there are reasons to believe that the full recoverability of the debt is in doubt and the debtor may not be able to repay its debt to the SRB.

Market risk

Market risk can be split into interest rate risk and currency risk.

Interest rate risk

The interest rate for cash held in current bank accounts is governed by the terms and conditions of the contracts signed with the banks.

As per the Guideline (EU) 2019/671 of the European Central Bank (ECB), the interest rate charged in respect of the cash accounts with Eurosystem central banks is the lower of zero, the ECB Deposit Facility Rate (ECB DFR) and the euro short-term rate (€STR) or EONIA, prior to its discontinuation on 3 January 2022. On 8 September 2022, the ECB announced that it was temporarily suspending the 0% cap, meaning that the lower of ECB DFR and €STR would be the relevant rate. If negative, the bank interest charge is taken by direct debit in the first days of the next month for the previous month. Since September 2022, the bank interest rate became positive and it is directly credited into the SRB's NCB accounts in the first week of the next month for the current month. Investments in securities also carry an interest rate risk, which is explained in section 10.3.

The Board has put in place strict controls on the amounts charged/credited by the banks, which are checked by recalculation; immediate action is taken to reclaim overcharged or under-credited amounts.

Foreign currency risk

Foreign currency risk is the risk that the SRB operations will be affected by changes in exchange rates. Foreign currency risk (or foreign exchange risk) arises on financial instruments that are denominated in a foreign currency, i.e. in a currency other than the functional currency in which they are measured.

As all the SRB's financial assets and liabilities are euro-denominated, the SRB was not exposed to foreign currency risk in 2022.

P) Changes in accounting policies

There were no changes to accounting policies for the financial year 2022 that could give rise to additional disclosures or restatement adjustments.

Q) Related party disclosure

The related parties of SRB are the key management personnel who hold positions of responsibility within the Board. They are responsible for the strategic direction and operational management of the entity and are entrusted with significant authority to execute their mandate.

Highest grade description	Grade	Number of persons on this grade
The Chair of the SRB	AD 16	1
The Vice- Chair of the SRB	AD 16	1
The other members of the Executive Session of the Board	AD 16	4

The transactions of the Board with the key management personnel during the financial year 2022 consisted only of remuneration, allowances and other entitlements, as determined for grade AD 16 in the Staff Regulation of the Officials of the European Communities and by Council Regulation No 422/67/EEC of 25 July 1967 and

Council Regulation (EU) 2016/300 of 29 February 2016. No loans or other amounts outside the provisions of the Staff Regulation were granted to management or staff.

R) Events after the reporting period

On 25 November 2022, the Council of the European Union appointed the Chair of the SRB who started his mandate on 9 January 2023. On the same date, the Council appointed a full-time member of the Board who will start her mandate on 22 March 2023.

At the issuance of these Financial Statements, the following should be mentioned:

- 1. Regarding events that concern a situation existing at 31 December 2022
 - 1.1. Ex-ante contributions restatements

By this date, the total amount of restatements for previous financial periods reached 107.95 million EUR (versus -46.71 million EUR reported last year). This amount has been included in the 2023 contribution cycle. According to the accounting policy applied by SRB in recognising non-exchange revenues, this amount has been assessed as not material for adjusting the recognised revenues from ex-ante contributions of 2022.

There have not been other material events that concern situations existing at 31 December 2022.

2. Regarding events that do not concern a situation existing at 31 December 2022 being related to new facts occurred during 2023

Below events represent non-adjusting events in terms of EU Accounting Rule 19 (IPSAS 14), which do not require any adjustments to the figures reported in these annual accounts. For subsequent reporting periods, they may affect the recognition and measurement of some assets and liabilities on the balance sheet and of some revenue and expenses recognised in the statement of financial performance.

2.1. Macro-economic outlook in the first months of 2023

The macroeconomic scenario and the outlook for the EU economy and financial markets remain challenging throughout 2023. In addition to the ongoing uncertainty stemming from Russia's ongoing invasion of Ukraine in 2022, the macroeconomic environment is confronted with new uncertainties following the banking sector turbulence (in the USA and Switzerland) in March 2023 and wider geopolitical tensions.

Compared to 2022, with an annual GDP growth rate of 3.5%, the European economy has slowed down significantly in recent months. In the first quarter of 2023, euro area GDP grew only marginally by 0.1%. Although the macroeconomic outlook has improved slightly since February 2023, given current expectations, the degree of uncertainty surrounding the euro area's short-term outlook is mixed, the recent survey indicators giving mixed signals about the way forward.

Inflation remains elevated in the first months of 2023 (7.0% in April). Although the market has seen a sharp slowdown in energy prices, core inflation has shown some persistence in price pressures, and this trend is expected to continue. The persistence of high inflation has become a threat. High inflation could continue to restrain households' purchasing power and force a stronger monetary policy response, with far-reaching macro-financial consequences.

Regarding impact of various macro-economic factors on the investments portfolio of the SRB, please see also the "Market outlook" at page 46.

The prospects for SRB banks have improved further in 2022, but are challenged by recent developments in 2023. The profitability of SRB banks is mainly driven by higher interest margins as a result of higher interest rates, but could also be negatively affected by open market valuation. Tighter monetary conditions feed also through the credit channel: borrowing costs increase while credit flows decrease. The declining trend in non-performing loans has also stabilized at a low level, but the number of non-performing loans is expected to increase with higher interest rates. Unlike in other jurisdictions, European banks are subject to liquidity or funding requirements that must be met at all times, which shielded them from the effects from the US banking sector turbulences. The SRB closely monitors all banks under its remit and remains vigilant, particularly with regard to any risks arising from the current uncertainty.

9. Notes to the Statement of financial performance

A) Revenues

Operating revenues	2022	2021
Revenues from non-exchange transactions	12,336,458,977.30	9,488,362,976.61
Revenues from ex-ante contributions to the SRF	12,239,925,332.62	9,406,700,062.15
Bad debt allowance	-	(1,614,832.19)
Revenues from administrative contributions	96,533,644.68	83,277,746.65
Other operating revenues (exchange)	7,325.00	6,857.97
Exchange rate gains	7,325.00	6,857.97
Revenues from administrative operations (exchange)	-	7,180.35
Other miscellaneous administrative revenues (exchange)	-	7,180.35
TOTAL	12,336,466,302.30	9,488,377,014.93

The major portion of the SRB's operating revenues consists of **non-exchange revenues**. In 2022, the SRB received *ex-ante* contributions to the SRF and administrative contributions.

Revenues from ex-ante contributions to the Fund

The total revenue for 2022 incorporates the effect of the following:

- a negative impact from the restatements pertaining to previous periods and newly supervised entities amounting to EUR 42 582 589.48 (2021: EUR 290 312.41);
- a positive impact from the voluntary termination of IPCs that generated additional ex-ante contributions amounting to EUR 7 308 660.03 (2021: EUR 24 239 866.97) and recognised as revenues within the year when they are invoiced and collected.

Revenues from administrative contributions

The determination and raising of Administrative Contributions is based on the Commission Delegated Regulation (EU) 2017/2361 of 14 September 2017 on the final system of contributions to the administrative expenditures of the Single Resolution Board, which came into force on 8 January 2018 and was amended by Commission Delegated Regulation (EU) 2021/517 of 11 February 2021.

Under the final system and its enlarged scope (all credit institutions established in the banking union need to contribute), it is stipulated that institutions that already paid by way of instalments under the provisional system will have their contributions recalculated. Any difference between the instalments paid and the recalculated contributions can be settled by increasing or decreasing the contributions due from these entities in the following years.

Pursuant to the Decision of the Executive Session of the Board of 29 April 2021 determining the 2021 contributions, the final amount to be invoiced was increased to cover the one-off payments to be reimbursed to those entities that either fell out of scope or had a changed status (as explained below).

Description	2022	2021
Administrative contributions — voted administrative budget	120,400,000.00	119,000,000.00
Less: positive result of previous years (budgetary cash based)	(45,387,679.98)	(59, 359, 169.28)
Add: additional amount collected on account of the deferred settlement cycle	225,035.87	150,416.85
Add: Other adjustments from calculation	1.02	0.22
Total amount invoiced to the institutions	75,237,356.91	59,791,247.79
Less: reimbursement towards institutions falling out of scope	(531.25)	(31,359.81)
Less: reimbursement towards institutions that changed status (less significant rather than significant entities)	(159,990.00)	(119,057.04)
Add: amount not yet reimbursed by 31 December 2022	(64,249.00)	6,289.22
Total amount available for the year	75,012,586.66	59,647,120.16
Add: pre-financing received in previous periods (accrual based)	30,408,564.50	66,896,939.81
Less: amount not spent during the year after covering all administrative and operational expenditure (long-term liability)	(8,887,506.48)	(43,266,313.32)
TOTAL	96,533,644.68	83,277,746.65

In accordance with the applicable accounting policy on the recognition of revenue from administrative contributions, the amounts invoiced to the banks in scope are recognised as income only up to the level of the yearly total expenses of the SRB.

Financial revenues

Description	2022	2021
Interest income on late payment of administrative contributions	4,858.00	639.29
Interest income from cash and cash equivalents	110,895,127.14	-
Financial revenues from financial assets measured at FVTNAE	23,597,496.74	31 ,101,434.24
Interest income on financial assets measured at FVTNAE	30,325,481,05	17,592,934.27
Income received at modification of a financial asset	-	-
Net realised gains/(losses) on sales of financial assets measured at FVTNAE	(6,727,984.31)	13,508,499.97
Other financial income	5,321.61	-
TOTAL	134,502,803.49	31,102,073.53

Since September 2022, based on the decision of the European Central Bank concerning the Euro Short-term rate (€STR) and Euro deposit facility rate, the interest rate applied on cash and cash equivalents is positive. Therefore, from funds held at both commercial and National Central Banks, the SRB has already registered bank interest income.

(*) Reconciliation between budgetary and accounting amounts	2022	2021
Total income from investments inscribed in year N budget	298,581,316.67	202,282,180.39
Less: realised losses inscribed in budget as expenses of year N (title IV)	-	(28,861.03)
Total NET revenues recognised in year N budget	298,581,316.67	202,253,319.36
Less: amounts inscribed in budget year N but cashed in year N-1 (timing difference)	(35,429,830.74)	(5,226,134.96)
Add: amounts cashed in year N, but inscribed in budget year N+1 (accrued)	86,947,873.22	35,248,168.98

B) EXPENDITURE

Operating expenses

Description	2022	2021
Administrative expenses	81,529,108.20	75,755,802.28
Staff expenses	54,780,682.11	47,211,388.90
Other expenses	26,748,426.09	28,544,413.38
Administrative expenses	3,730,753.94	4,827,083.17
IT expenses	8,926,823.35	12,077,003.60
Other services (non-IT)	4,271,801.23	3,243,273.54
Land and buildings	6,291,068.17	5,100,879.89
Fixed assets expenses	3,527,979.40	3,296,173.18
Operational expenses	13,934,912.19	5,231,546.37
Other operational expenses	13,914,170.65	5,207,526.12
Exchange rate losses	20,741.54	24,020.25
TOTAL	95,464,020.39	80,987,348.65

In 2022, 67% (2021: 58%) of SRB administrative expenses was linked to staff, while 19% (2021: 35%) was related to other significant administrative expenses (rent and IT support).

The operational expenses increased in 2022 and represent 15% of the total expenses (2021: 6%).

Financial expenses

Description	2022	2021
Financial expenses		145,837,062.76
Interest on financial liabilities at amortised cost	-	-
Interest charges on cash and cash equivalents	95,157,858.45	145,834,152.31
Late payment interest expense	-	1,206.19
Interest expense on finance lease	-	1,704.26
Other financial expenses (bank charges)	12,240.55	7,141.02
TOTAL	95,170,099.00	145,844,203.78

The interest charges on cash and cash equivalents decreased in 2022 due to the positive bank interest rates which cancelled out the usual effect of negative interest rates applied for cash and cash equivalents kept at NCB in current accounts. More details on the change of bank interest rates could be found at page 39.

10. Annex — The Single Resolution Fund ('SRF')

The SRF was established by the SRM Regulation and is composed of contributions from credit institutions and certain investment firms in the 21 Eurozone Member States participating in the banking union.

The SRF ensures that the financial industry, as a whole, finances the stabilisation of the financial system.

As previously explained, the SRF will be gradually built up during its first 8 years (2016-2023) and must reach the target level of at least 1% of the amount of covered deposits of all credit institutions in the banking union by 31 December 2023.

The purpose of the Fund — using the Single Resolution Fund in resolution

Within the resolution scheme, the SRF may be used for capital or liquidity support only to the extent necessary to ensure the effective application of the resolution tools. The Fund may be used for the following purposes (Article 76 of the SRM Regulation):

- 1. to guarantee the assets or the liabilities of the institution under resolution, its subsidiaries, a bridge institution or an asset management vehicle;
- 2. to make loans to the institution under resolution, its subsidiaries, a bridge institution or an asset management vehicle;
- 3. to purchase assets of the institution under resolution;
- 4. to make contributions to a bridge institution and an asset management vehicle;
- 5. to make a contribution to the institution under resolution in lieu of the write-down or conversion of liabilities of certain creditors under specific conditions;
- 6. to pay compensation to shareholders or creditors who incurred greater losses than under normal insolvency proceedings.

The SRF must not be used to absorb the losses of an institution directly, or to recapitalise an institution.

In exceptional circumstances, where an eligible liability or class of liabilities is excluded or partially excluded from the write-down or conversion powers, a contribution from the SRF may be made to the institution under resolution under two key conditions, namely:

- Bail-in of at least 8%: losses totalling not less than 8% of the total liabilities including own funds of the
 institution under resolution have already been absorbed by shareholders after accounting for losses
 incurred, the holders of relevant capital instruments and other eligible liabilities through write-down,
 conversion or otherwise.
- Contribution from the SRF of a maximum of 5%: the SRF contribution does not exceed 5% of the total liabilities including own funds of the institution under resolution.

During 2022, there was no use of the Fund.

Ex-ante contributions to the Fund

Contributions are raised annually from institutions within the scope of each of the 21 member states of the banking union. The NRAs are responsible for the collection of contributions and their transfer to the SRF.

Cycle 2018: EUR 6.73 billion from 3 512 institutions Cycle 2019: EUR 7.01 billion from 3 315 institutions Cycle 2020: EUR 9.31 billion from 3 066 institutions Cycle 2021: EUR 10.4 billion from 3 018 institutions Cycle 2022: EUR 13.6 billion from 2 896 institutions

Irrevocable payment commitments

According to Council Implementing Regulation (EU) 2015/81, credit institutions are allowed to use IPCs to pay a part of their contribution as an alternative to cash payments of *ex-ante* contributions. The amount that can be transferred under the IPC agreements is defined based on strict criteria, which take into account the limits stated by the applicable regulation.

All IPC agreements contain a provision that states that in a negative interest rate environment institutions will be asked to replenish the interest that has accrued on the collateral over the course of the year. On the contrary, in case of positive interest rates, the Board will return the interest income to those banking institutions with IPC.

More details on the accounting treatment applied by the SRB in relation to the IPCs and a brief account of the IPC mechanism can be found on page 18-19.

Market outlook

2022 was characterised by unprecedented market developments. Following the onset of the war in Ukraine, inflation, both expected and realised, rapidly increased as markets assessed it as being more permanent in nature than previously anticipated. Yields rose substantially as central banks were expected to begin hiking interest rates in response. Such moves had an impact on the income on the cash and securities contained in the SRB Portfolio.

As the ECB tightened monetary policy, the euro short-term rate ("€STR") became positive in September whilst the ECB also announced the temporary removal of the 0% cap on remuneration of government deposits. This meant that for the remainder of the year, the SRB's cash balances received a positive rate of interest (€STR). This was beneficial to the income of cash balances which had previously incurred negative interest.

Regarding the securities portion, the intrinsic or economic value of securities was positively impacted by the increase in yield as new purchases may be made at higher yields. This income, the change in the amortised cost value, is accrued until the maturity of the security when is realised in the SRB's accounts. From a fair or market value perspective, the increase in yields had a negative impact on valuation. Differences between the amortised cost value and the prevailing market value are captured in fair value revaluation reserve (part of Other Comprehensive Income, OCI, which reverts to zero at the maturity of the security if it is not sold. This amount is not realised in the SRB's accounts.

Fund analytical accounts as at 31 December 2022

To give a detailed view of the Fund transactions as reflected in the SRB accounts, a separate Statement of financial position and Statement of financial performance, including only the Fund transactions, were prepared and are presented below.

ANALYTICAL FINANCIAL STATEMENTS 2022 - THE SRF

10.3 Investment portfolio of the SRF

The implementation of the SRB's investment policy commenced in 2018 with a total of EUR 9 billion invested in two mandates. In 2019, an additional EUR 6.4 billion was invested across three mandates, bringing the total amount invested to EUR 15.4 billion at the end of 2019. At the end of 2022, the total amount invested across three mandates was EUR 27.6 billion after additional transfers from 2020 to 2022. The mandates are based on the Strategic Asset Allocation defined in the SRB's 2022 Investment Plan, which operationalises the SRB's investment strategy, as referred to in Article 75 of the Regulation (EU) No 806/2014 and in Delegated Regulation (EU) 2016/451. The mandates include securities as well as a cash position.

The currency of the investments is euro.

The SRB is allowed to make investments with the financial means collected and hold these in current accounts, while taking into account both the financial capacity of the Fund and the expected disbursements.

The investment objectives in place are to satisfy liquidity requirements and protect the value of the SRF in order to support the efficient application of resolution tools. Satisfying liquidity needs means that the SRF must be able to provide the required amount of liquidity at any time at short notice. To this end, the amounts held in the SRF can be invested in liquid assets of high credit quality.

Although the SRB has in principle the intention of holding securities until maturity, the ability to do so is constrained by the purpose of the SRF, i.e. the need to have amounts available at short notice to support resolution needs.

In addition to cash, the following asset classes were invested in as part of the 2022 Investment Plan:

- government bonds from Member States in the Banking Union (with ratings not lower than BBB-);
- government T-Bills from selected Member States;
- supranational bonds (multilateral development banks and international organisations);
- government-related bonds (agency bonds, regional and local authority bonds, government development bank bonds and sovereign bonds from European Union Member States); and
- corporate bonds issued by non-financial institutions with a minimum rating of BBB- from Eurozone country and with a minimum rating of A- from selected countries outside the Eurozone.

All securities bought, at the time of purchase, must have a yield above the risk-free rate, which is defined as the rate applicable to deposits held in current accounts.

Presentation of the investment portfolio of the SRF

Based on the presentation requirements applied by the SRB (EU Accounting Rule 2), a distinction has been made between the current and non-current portions of the portfolio with the purpose of giving information on when the cash flows from the securities will be realised.

Fair value hierarchy	CURRENT OR NON- CURRENT	31.12.2022	31.12.2021
Financial assets measured at FVTNAE with remaining maturity > 1 year	NON- CURRENT	19,447,222,120.02	14,363,184,408.86
Financial assets measured at FVTNAE with remaining maturity < 1 year	CURRENT	4,546,570,589.29	2,092,515,614.63
Financial assets measured at FVTNAE expected to be sold within the following year	CURRENT	-	360,939,822.07
TOTAL		23,993,792,709.31	16,816,639,845.56

Determination of fair value

After initial recognition, the SRB subsequently measures the investments at their fair value, which normally corresponds to the bid price for the financial asset (based on the liquid and highly-rated nature of the bonds in which Delegated Regulation (EU) 2016/451 allows the SRB to invest).

Fair value hierarchy

For financial instruments traded in active markets, the determination of the fair value of financial assets and financial liabilities is based on quoted market prices or dealer price quotations.

A financial instrument is considered to be trading in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Where the fair values of financial instruments cannot be derived from active markets, they are determined using valuation techniques that include the use of mathematical models. The chosen valuation techniques incorporate factors that market participants would take into account in pricing a transaction and are based whenever possible on observable market data. If such data are not available, a degree of judgement is required in establishing fair values.

Fair value hierarchy 2022	Active market quoted market price	No active market valuation techniques	TOTAL
Financial assets measured at FVTNAE	23,993,792,709.31	-	23,993,792,709.31
TOTAL	23,993,792,709.31	-	23,993,792,709.31

Impairment of bonds

The SRB calculated the expected credit loss on 31 December 2022, which was EUR 26,375,724.19. The loss allowance equals the 12-month ECL.

Risk management and governance of the investment process

According to Article 67 of the SRM Regulation, the owner of the Fund is the Board. The Board in its Plenary Session has adopted a governance framework as part of the investment strategy, detailing the division of tasks and responsibilities between the Board in its Plenary Session and in its Executive Session. One of the elements of the governance framework is that the Board in its Executive Session approves an internal governance structure for investments. The Board in its Executive Session has adopted a risk management process following the three lines of defence model.

1. First line of defence for risk management — SRF Unit

The SRF Unit is responsible for the development and implementation of the SRB's investment policy. As the portfolio management activities, in particular securities selection and transactions execution, are outsourced to a portfolio management service provider, the main role of the unit is to advise the Board in its Executive Session on the investment policy, on the implementation of this policy and on the selection and monitoring of outsourcing partners. The SRF Unit reports to the Vice-Chair.

2. Second line of defence for risk management — Investment Risk Manager

The responsibility of the second line risk manager is to ensure that all risks are adequately identified, measured, assessed and managed by the SRF Unit, including ensuring compliance with risk processes. The second line risk manager operates outside the SRF Unit, providing independent judgement. The Investment Risk Manager reports to the Vice-Chair.

3. Third line of defence for risk management — Internal audit

The third line of defence is the internal audit function. The role of the internal audit is to provide independent assurance on the quality and effectiveness of the investment processes, including risk management. The internal auditor reports to the SRB Board in its Plenary Session.

The Fund Committee in its Investment Composition (FCIC) advises on decisions to be taken by the Board in its Plenary Session pertaining to investments. The FCIC is composed of experts from the 21 NRAs, the European Commission, the European Banking Authority and the ECB.

The Investment Committee advises the Board in its Executive Session on all investment-related topics and is composed of one board member and the Vice-Chair as members, the Head of the Contributions, Funding & Financing and Investments, representatives of the SRF and the Investment Risk Manager as regular attendees.

Risks overview

Financial risks are the risks linked to the investment of *ex-ante* contributions in the financial markets. They can be further grouped into:

- market risk,
- credit risk, and
- liquidity risk.

In relation to the current investments held by the SRB, the above types of financial risks are accepted to a certain extent. Other types, such as counterparty or currency risk, are not currently accepted.

The quantitative and qualitative limits of the financial risks are defined by the SRB on an annual basis and are annexed to the SRB investment plan. In addition, they are also included in the SRB risk management framework, which is communicated in the form of guidelines to the investment portfolio managers.

Market risk

Market risk is the risk of loss arising from changes in the value of financial assets due to fluctuations in interest rates, foreign exchange rates and other factors affecting the price of securities. In the case of the investment portfolio held by the SRB, the main market risk is the interest rate risk (as long as the currency risk is not relevant, as is the case at present).

The interest rate risk can be expressed based on the modified duration of the securities, which gives the change in the value of a security in response to a change in interest rates.

Remaining maturity	Fair value amount in portfolio (including tactical cash)	Contribution to modified duration	%
0-3 years	14,411,095,286.54	0.71	0.24
3-5 years	5,103,467,040.51	0.75	0.25
5-7 years	2,958,725,561.21	0.63	0.21
7-10 years	2,908,516,283.10	0.87	0.29
TOTAL	25,381,804,171.35	2.96	1.00

Stress testing results

As part of risk management of the investment portfolio, the SRB requests its outsourcing partners to perform stress tests on the SRF portfolio with the purpose of getting a view of the potential financial impacts on the SRB investments portfolio against future financial situations.

The stress tests are performed on an annual basis. The latest stress tests were applied to the portfolio as of 31 December 2022 invested in government bonds, supra-nationals, government related bonds and corporates.

The key features of stress test scenarios 1, 2 and 3 are summarized in the following table:

	Description of the		sumptions – narket interes		n the net /equity	
Scenario	impact on the valuation of the investment portfolio	2 years	5 years	10 years	Impact in Million EUR	% of securities value
Scenario 1	Normalisation of the ECB monetary policy by increasing interest rates	+ 160bp	+140bp	+100bp	-969	-3,81%
Scenario 2	Spike in sovereign risk The market differentiates between countries according to their creditworthiness and classification as core, semi-core or non-core Eurozone issuers.	+150bp to +700bp (depending on whether the issuer is core, semi-core or non-core)	+200bp to +600bp	+200bp to +600bp	-1,516	-5,96%
Scenario 3	Resolution of a systemic European bank involving the use of the SRF	The liquidation cost is measured for each holding in the portfolio and the total impact on the portfolio is the sum of cash values of successive daily sales compared to the initial value of the portfolio.			-852	-3,35%

Credit risk

Credit risk is the risk of loss arising from the inability of a counterparty, issuer or other obligor to fulfil its contractual obligations for full value when due. The tables and figures below give a breakdown of the portfolio by second-best rating (based on the rating scales used by S&P/Fitch/Moody's/DBRS), by counterparty type and by geographical coverage.

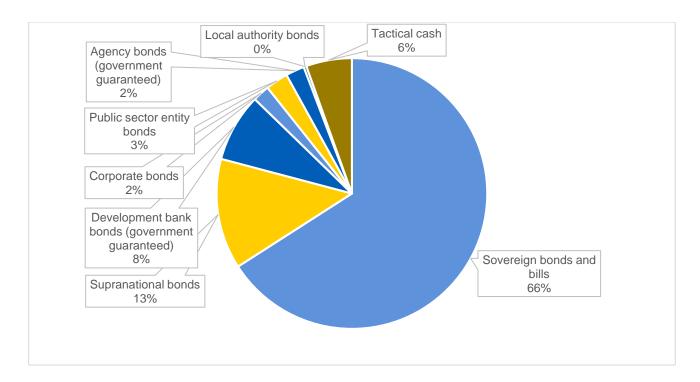

Exposure by credit rating

Description	31.12.2022	31.12.2021

Impairment analysis

The following table shows the movement in ECL that has been recognised for bonds in the investment portfolio in accordance with the general approach set out in IPSAS 41.

	12month	Lifetime ECL not credit impaired	Lifetime ECL credit impaired	Amount is written off	Total
Balance at 1 January 2022	46,541,069.69	-	-	-	46,541,069.69
Net re-measurement of loss allowance	10,508,704.18	-	-	-	10,508,704.18
Amounts written off	-	-	-	-	-
Amounts recovered	-	-	-	-	-
Change in loss allowance due to new bonds purchased net of those derecognised due to settlement or sale	5,478,088.51	-	-	-	5,478,088.51
Changes in credit risk parameters	-	-	-	-	-
Adjustment of previous year	(36,152,138.19)	-	-	-	(36,152,138.19)
Balance at 31 December 2022	26,375,724.19	-	-	-	26,375,724.19

The following table explains how significant changes in the gross carrying amount of the bonds in the investment portfolio contributed to changes in the loss allowance:

31/12/2022	12month	Lifetime ECL not credit impaired	Lifetime ECL credit impaired	Amount is written off
Purchase of FVTNAE	(12,710,155,065.41)	-	-	-
Settlement of FVTNAE	2,383,582,000.00	-	-	-
Sale of FVTNAE	504,704,776.15	-	-	-
Significant increase in credit risk of FVTNAE	-	-	-	-

Liquidity risk

Liquidity risk is the risk of loss arising from a position that cannot be liquidated in due time without a significant impact on its market price.

The tables below present an analysis of the SRB's financial investments by contractual maturity at issuance and by remaining maturity, taking into account the period remaining between the reporting date and the contractual maturity date.

Contractual maturity	< 1 year	1-5 years	>5-10 years	>=10 years	TOTAL
Financial assets measured at FVTNAE	89,588,600.00	5,610,714,956.16	14,445,295,692.50	3,848,193,460.65	23,993,792,709.31
Tactical cash	1,388,011,462.04	-	-	-	1,388,011,462.04
TOTAL	1,477,600,062.04	5,610,714,956.16	14,445,295,692.50	3,848,193,460.65	25,381,804,171.35

Remaining maturity	0-3 months	3 months-1year	>1year-5 years	>5years	TOTAL
Financial assets measured at FVTNAE	1,147,923,764.60	3,398,646,824.69	13,579,980,275.71	5,867,241,844.31	23,993,792,709.31
Tactical cash	1,388,011,462.04	-	-	-	1,388,011,462.04
TOTAL	2,535,935,226.64	3,398,646,824.69	13,579,980,275.71	5,867,241,844.31	25,381,804,171.35

Market liquidity risk is minimised by investing in high credit quality liquid assets and by using appropriate measurements to ensure the timely detection of deteriorations in the liquidity of the portfolio.

II. Report on Budgetary and Financial Management 2022

Introduction

As stated in Article 89 of the SRB Financial Regulation, the accounts are to be accompanied by a report on budgetary and financial management for the financial year. The report is drawn up under the responsibility of the Chair, and the relevant part will be included also in the annual activity report.

Budget

In accordance with Article 58 of the SRM Regulation, the budget of the SRB comprises two parts: Part I for the administration of the Board and Part II for the Fund.

The SRB has an autonomous budget, which is not part of the general budget of the Union. Part I of its budget is financed through contributions paid by the banking industry, while Part II is financed through a variety of sources described in Article 60 of the SRM Regulation.

The initial adopted budget for 2022 amounted to EUR 120,400,000.00 for Part I (EUR 119,000,000.00 in 2021). The Plenary Session of the Board adopted two amending budgets, on 11 May 2022 and 8 December 2022:

The first amending budget was adopted for the increase of the commitment appropriations EUR 10 million in the budget line 3204-Consultancy and advice.

The second amending budget was adopted to introduce the positive result of the previous year for the amount of EUR 36,822,987.56 in the 2022 budget. In accordance with Article 16 of the SRB Financial Regulation, a positive budget result is to be entered in the SRB budget for the following year as revenue. In practice, this means that the budget always has to be amended when the budget of the previous year has not been spent in full. The second part of the second amending budget was related to a budget transfer between titles from title 3 to title 1 of EUR 1,289,000.

Revenue

Part I — Administration

The SRB budget is expenditure driven and the total revenue in a budget year is the same amount as the estimated expenditure for that year. In accordance to Article 65 of the Regulation (EU) No 806/2014 on the Single Resolution Mechanism, in order to cover its administrative expenditures, the SRB shall raise contributions from all institutions that fall within the scope of the SRM Regulation.

The Commission Delegated Regulation (EU) No 2017/2361 on the final system of contributions to the administrative expenditures of the SRB, forms the legal basis for the calculation of administrative contributions since 2018.

As from 2022, the SRB adapted its process to the amended Commission Delegated Regulation (EU) 2017/2361¹. A new system was introduced whereby an advance payment is collected from significant institutions at the beginning of each financial year in Q1 and a final contributions in Q3.

Advance instalments

Article 4a(1) of the Delegated Regulation empowers the Board to raise advance instalments to cover the expenditures it expects to incur in the period prior to the raising of annual contributions:

Taking into account the projected cash flows for the first 8 months of 2022 (EUR 25.7 million) and need to allow for an additional financial buffer to safeguard the SRB position in financial terms: the Board decided to raise EUR 30 million by way of advance instalments in 2022 (40% of the total amount referred to under Article 3(1)).

The contributors to the advance instalments are the institutions under the SRB direct remit (120 entities and groups).

Advance instalments were calculated as a proportion of the institutions' 2021 individual contributions: in 2022, institutions were requested to pay 53.51% of their 2021 individual contributions as advance instalments.

The advance instalments paid were deducted from the institutions' individual annual contributions raised in Q3 2022.

The total amount of the advance instalments for the 2022 administrative contributions (EUR 30 million) was successfully collected on 14/04/2022.

Annual contributions

For the 2022 contributions cycle, the Board has calculated the amount of annual contributions in accordance with Articles 3 and 7(7) of the delegated regulation. The total amount of annual contributions to be raised for the 2022 contributions cycle amounted to EUR 75,035,152.38. This amount corresponds to the 2022 SRB Budget (EUR 120,400,000) minus the surplus of the 2020 budget (EUR 45,387,679.98) plus the deficit resulting from the recalculation of contributions for the previous financial year(s) (EUR 22,832.36).

The contributors to the annual instalments are the institutions under the SRB direct remit (2,237 entities and groups).

The SRB requested 2217 institutions to pay their contributions. Twenty institutions were eligible for repayment of the contributions paid in 2021.

-

Commission Delegated Regulation (EU) 2017/2361 of 14 September 2017 on the final system of contributions to the administrative expenditures of the Single Resolution Board, OJ L 337, 19.12.2017, p. 6, amended by Commission Delegated Regulation (EU) 2021/517 of 11 February 2021 amending Delegated Regulation (EU) 2017/2361 as regards the arrangements for the payment of contributions to the administrative expenditures of the Single Resolution Board, OJ L 104, 25.3.2021, p. 30-33.

2098 institution paid their annual contribution by the payment deadline date 07/10/2022.

At the end of December 2022 only 5 institutions haven't paid their contributions either because of insolvency cases, mergers or other special cases.

Other revenues

In addition, EUR 15,825.85 of miscellaneous income was collected, representing recovery of administrative expenses.

Part II — Fund

The income for 2022 was estimated at approximately EUR 11.21 billion. The actual total calculated exante contributions for 2022 amounted to EUR 13.67 billion (including paid-in amount of EUR 12.23 billion and IPC cash collateral of EUR 1.44 billion). The target size of the SRF is set at 1% of covered deposits by end 2023.

All these revenues were inscribed in the budget as commitment appropriations. The Fund will end up at above EUR 70 billion, taking into account the current annual growth in covered deposits. The SRF can be used to support the effective resolution of a failing bank, if needed

The revenues from invested funds (cashed coupons) are valued at EUR 271,422,563.99 and EUR 27,158,752.68 for the positive interests generated from the central bank accounts.

After covering the yearly negative bank interest of EUR 128,054,897.12 and bank charges of EUR 4,216 the assigned revenue at the end of 2022 reached a total of EUR 59,579,483,554.67.

Expenditure

Part I — Administration

Title I — Staff

The implementation rate of the Title I budget was 98.20% (EUR 57,553,946.54) of the available appropriations (EUR 58,609,000.00). Of the amount committed, EUR 56,709,290.84 was paid, which corresponds to an implementation rate of 98.53 % of the total committed. EUR 844,655.70 was carried over to 2023 and EUR 1,055,053.46 was cancelled. The cancelled appropriations will be taken into account in the budget result for the year.

The main area of expenditure was related to the SRB staff in active employment: EUR 52,465,402.65 was spent on the payroll (basic salaries, family allowances, expatriation, installation and foreign residence allowances, insurances, pension rights, etc.). EUR 1,722,397.44 was spent for early childhood centers and schooling and EUR 1,627,915.26 for administrative assistance from community institutions.

<u>Title II — Building, equipment and miscellaneous operating expenditure</u>

The implementation rate of the Title II budget was 93.89% (EUR 16,834,470.16) of the available appropriations (EUR 17,930,000.00). Of the amount committed EUR 12,448,741.45 was paid, which corresponds to an implementation rate of 73.95% of the total committed. EUR 4,385,728.71 was carried

over to 2023 and EUR 1,095,529.84 was cancelled. The cancelled appropriations will be taken into account in the budget result for the year.

The main areas of expenditure were the rental cost of the premises (EUR 3,468,483.78), ICT administrative costs in chapter 21 and budget line 2410 (EUR 5,898,330.47) and security and maintenance of the building (EUR 1,592,903.86).

<u>Title III — Operating expenditure</u>

The implementation rate of the Title III budget was 53.78% (EUR 31,797,604.51) of the available commitment appropriations (EUR 59,129,000.00). The final amount paid was EUR 23,760,520.49, which corresponds to 54.17% of the total planned payment appropriations under Title III. Excluding Chapter 32 "SRB Contingencies", the implementation rate of the payment appropriations amount to 94.84%.

Due to the differentiated appropriations, only the payments appropriations of the non-differentiated budget lines in Title III (EUR 472,663.43) have been carried over to 2023. The payments appropriations of the budget 2023 must cover not only the proportion of payments arising from 2023, but also the payments outstanding from 2020, 2021 and 2022 commitments.

The overall budget implementation in Chapter 31 "SRB operations" was 85.75% in commitment appropriations. The postponement of the credit rating services project (EUR 3 million) and the variable fees of the outsourcing of investments has impacted the budget implementation. The ICT expenditure in title 3 was implemented with a budget execution rate of 93.49% in commitment appropriations.

As the nature of the activities under Chapter 32 "SRB Contingencies" is such that implementation is more difficult to forecast than the other expenditure items, the overall budget implementation under this Chapter ended as well lower than planned. The low budget implementation is due to low expenditure in professional consultancy and expert advice services as the SRB had to manage fewer potential resolution and litigation cases than anticipated.

The main areas of expenditure under the Title III related to legal services and litigation, ICT development and maintenance of operational IT solutions, in particular to support resolution planning and decision activities, and the outsourcing costs of investments.

Part II — Fund

The Fund expenditure was a total amount of EUR 128,059,113.12, consisting of payments for negative bank interest charges and for bank charges incurred in depositing the collected amounts with the SRB's NCB accounts and investment accounts.

Budget outturn

The budget outturn for 2022 is EUR 24,724,277.99 (EUR 36,822,987.56 in 2021) and will be entered in the 2023 budget after approval by the Board in its Plenary Session in September 2023. The budget outturn will be deducted from the administrative contributions to be collected in year N+2.

Financial management

In 2022, the main achievements in financial management were:

- Continue to improve the full paperless processing of all financial transactions, with the increased use of the qualified electronic signatures;
- The budget implementation rate on commitment appropriations improved in 2022 with 10% increase in part I of the budget and 8% excluding the Chapter 32-Contingencies. The target was 2% (KPI 21 'Year-to-year improvement of the budget execution rate' (in commitments appropriations and excluding Chapter 32 'SRB Contingencies');
- 96.80% of payments were made on time (97.7% in 2021), just below the internal target 2022 key performance indicator 'Timely payment of invoices target 97 %;
- The Annual Accounts of 2021 financial year were granted an unqualified audit opinion by the European Court of Auditors.

III BUDGET IMPLEMENTATION

a. Budget outturn result 2022 (adapted DG Budget format)

Amending budget adopted by the Plenary Session of the Board

Amending budget	SRB Decision	Date of adoption	Description	Impact on commitment appropriations	Impact on payment appropriations
1st	SRB/PS/2022/04	11/05/2022	Pursuant to the SRB's Financial Regulation Article 31 and 32, any amending budget shall be adopted by the same procedure as the initial budget. - Increase of commitment appropriations in budget line BL3204 Consultancy and advice	EUR 10 000 000.00	-
			1) In accordance with Article 16 of the SRB Financial Regulation, a positive budget result shall be entered in the SRB budget for the following year as revenue. In practice, this means that the budget always has to be amended when the budget of the previous year has not been spent completely. The 2021 budget surplus amounts to EUR 36,822,987.56 has been inscribed in the budget reserve and it will be used to reduce the administrative contributions to be collected in 2023.	EUR 36 822 987.56	EUR 36 822 987.56
2nd	SRB/PS/2022/18	08/12/2022	2) Pursuant to the SRB's Financial Regulation Article 24, 31 and 32, any amending budget shall be adopted by the same procedure as the initial budget. - Budget transfer more than 10% between titles. EUR 1 289 000.00 from budget line BL3204 Consultancy and advice to budget line(s): BL1100 Basic salaries (+ EUR 958 000.00) BL1101 Family allowances (+ EUR 74 000.00) BL1102 Expatriation and foreign residence allowances (+ EUR 190 000.00) BL1131 Insurance against sickness (+ EUR 2 000.00) BL1132 Unemployment insurance (+ EUR 17 000.00) BL1133 Constitution or maintenance of pension rights (+ EUR 48 000.00)	EUR 1 289 000.00	EUR 1 289 000.00

f. Reconciliation of the accrual-based result with the budgetary outturn result

The economic result of the year is calculated on the basis of accrual accounting principles. However, the budget result is based on modified cash accounting rules, in accordance with the SRB Financial Regulation. As the economic result and the budget result both cover the same underlying operational transactions, it is a useful safeguard to ensure that they are reconcilable.

	Economic result (profit or loss) of the year	+/-	12,299,303,419.54
