### The SRB filing rules refer to:

- The EBA XBRL filing rules, EBA/XBRL/2020/03, version 4.4 of 31 March 2020 (hereafter "EBA XBRL filing rules") shall be the SRB filing rules reference with differences laid down in this document. The SRB amendments to this set of rules shall supersede the EBA XBRL filing rules. Any reference to the EBA in the EBA XBRL filing rules should be read as a reference to the SRB. Any reference to the CA in the EBA XBRL filing rules should be read as a reference to the NRA.

- The CEN document CWA 16744-4<sup>1</sup> as referenced in "EBA filing rules, 4.4".
- Only the XBRL files (.xbrl) uploaded by the NRAs on the SRB portal.

**The EBA XBRL filing rules document is amended as follows:**

- "Competent authority (CA)" has to be read as "National Resolution Authority (NRA)" in the entire document for the purpose of the Resolution Reporting.
- The full content of the section on the Scope of Application (page 10) is replaced by the paragraph:

"These filing rules represent a collection of additional rules and guidance specifically applicable to the remittance of XBRL instances for reporting entities (e.g. credit institutions) in scope of relevant legislation concerning filings by relevant national and supranational authorities to the SRB."

- The section "Relationship to Other Work" (pages 11 and 12) is replaced by:

"This document should be read in conjunction with the SRB Taxonomy published end September 2020 on the SRB website:

<https://srb.europa.eu/en/content/reporting>

The guidelines in this document pertain to XBRL filings. Parts of this document reiterate for expository clarity certain syntactic and semantic restrictions imposed by XBRL, but this document does not modify XBRL. In the event of any conflicts between this document and XBRL, XBRL prevails. This document does place additional restrictions beyond those prescribed by XBRL.

The rules are based closely on the recommendations of the CEN Workshop Agreement on European filing rules developed by the CEN WS/XBRL project (<http://cen.eurofiling.info/>).

- Page 21, the rule 2.6 is complemented with the following restriction: the maximum number of digits is set to 15 in case of domain type set as integer.
- Page 21, the rule 2.8 is replaced by

"The xbrli:identifier element combined with the @scheme attribute allows the identification of the reporting entity by the receiver. The @scheme provides a URI which uniquely identifies the type of identifier used in the xbrli:identifier node (see section "3.6 LEI and other entity codes").

a) Instances should use a @scheme attribute that is prescribed by the receiving NRA.

---

<sup>1</sup> Technical standard published by the CEN, "Improving transparency in financial and business reporting — Harmonisation topics — Part 4: European Filing Rules", CWA 16744-4, April 2014.

- b) Instances MUST use an identifier acceptable to the receiving regulator (likely to be one recognized in their reporting system), and that corresponds to the @scheme attribute used.
  - c) For remittance of data by NRAs to the SRB, the entity identifier used should be a Legal Entity Identifier, and must have been registered with the SRB by the NRA prior to remittance."
- Page 24, the rule "2.16.1 — No multi-unit fact sets" is not applicable. Instead a new rule is introduced on page 29 of the EBA filing rules under the section:

### **"3.1 – Choice of Currency for Monetary facts"**

Dealing with currency conversions in the reporting process increases the complexity of IT systems.

**Instances MUST ONLY use EURO as unit for their business facts."**

This rule refers to the rule 2.23 of the CWA 16744-4.

- Page 32, "the rule 3.6 LEI and other entity codes" is replaced by

"3.6 LEI code and other entity codes Practical Considerations

For second level remittance to the SRB, the entity code used must be pre-registered with the SRB by the appropriate NRA.

If there is an "LEI CODE" for the institution as can be found on the Legal Entity Identifier Regulatory Oversight Committee website

*<http://www.leiroc.org/>*

then the IDI must be the "LEI CODE". Institutions without LEI codes are encouraged to request one for future reporting periods, if they have not already done so. If there is no "LEI CODE" for the institution then the IDI must consist of either the "RIAD code" for the institution, also published on the ECB website for Monetary Financial Institutions (see link above); or the local identifier at the national level as assigned by the NRA.

A list of identifiers for institutions has been provided to receiving NRAs.

- Page 41, the diagram is not applicable.
- Page 42, the paragraph "File naming structure for remittance to the EBA" is replaced by

### **"File naming structure for remittance to the SRB"**

The file naming structure for remittance to the SRB is as follows:

*IDI\_Country\_TaxonomyVersion\_Filingtype\_ReferenceDate\_CreationTimestamp.xbrl*

Where:

IDI	<p>Identifier of the Institution. This is a text string of variable length. A list of known (unique) identifiers has been provided to NRAs for entities in scope as concerns the 2020 data collection process. The unique identifier consists of one of the following:</p> <ul style="list-style-type: none"> <li>- The Legal Entity Identifier (LEI) code,</li> </ul> <p>or if LEI is not available</p> <ul style="list-style-type: none"> <li>- The RIAD MFI code,</li> </ul> <p>or if nor LEI nor MFI are available</p> <ul style="list-style-type: none"> <li>- An alternate code when neither of the above are available</li> </ul>																																																																																																																																																															
Country	Two letter ISO Country Code of the NRA submitting the report. For example DE for the German NRA																																																																																																																																																															
Taxonomy Version	Framework name defined by the SRB XBRL taxonomy in uppercase followed by the taxonomy version in 6 digits FRAMEWORKNAMEXXYYZZ. For example for the Resolution reporting taxonomy XX=05, YY=00 and ZZ=07 which gives RES050007.
